Strategic report

Principal activities

Actium Topco (UK) Limited (the "Company") is the holding company for a global group of companies (the "Group"), the principal activity of which is the provision of specialist consulting and related services to clients in the financial services industry

The Group operates across a number of boutiques

Asset & Wealth Management Delivering management consulting, technology consultancy and implementation services to the asset and wealth management sector	Alternatives Delivering management consulting, technology consultancy and implementation services to the alternatives sector
Insurance Delivering management consulting, technology consultancy and implementation services to the insurance sector	Strategy & Deals Delivering specialist corporate strategy and M&A consulting services for clients across the financial services industry
Agency Delivering specialist marketing expertise for the asset and wealth management and alternatives sectors	Aiviq Connecting asset managers with AUM, flow and revenue data across global markets to increase net sales, client oversight and automate reporting

Business review

The Company was incorporated in the prior period on 22 May 2024, with capital provided by certain funds managed by Bridgepoint Advisers Limited ("Bridgepoint"), and subsequently commenced trading upon the acquisition of Alpha Financial Markets Consulting plc and its subsidiaries ("Alpha") on 19 August 2024. Alpha is a leading global consultancy to the financial services industry, which was de-listed from the Alternative Investment Market ("AIM") shortly after completion of the acquisition. The £625.9m acquisition of Alpha was funded through a mixture of equity and debt. This represented a pivotal milestone for Alpha, with the investment by Bridgepoint providing a strong endorsement of Alpha's strength and future potential.

These consolidated financial statements for the year ended 31 March 2026 represent the first full financial year following the acquisition of Alpha. The comparative period ended 31 March 2025 reflects a short accounting period commencing on 22 May 2024 and includes approximately 7.5 months of trading activity from the date of acquiring Alpha on 19 August 2024. Accordingly, the results for the year ended 31 March 2026 are not directly comparable to those of the comparative period. Where relevant, references to annualised figures relate to the performance of the Group on a twelve-month basis to facilitate a more meaningful comparison of underlying trading performance.

Strategic report (continued)

Business review (continued)

Key performance indicators	Year ended 31 March 2026	Period ended 31 March 2025
Revenue	£366.1m	£172.8m
Gross profit	£111.8m	£52.8m
Adjusted EBITDA ¹	£66.5m	£28.8m
Operating loss	£(16.1)m	£(10.3)m
Operating cash flow	£40.3m	£(8.7)m
Net assets	£140.6m	£195.8m
Headcount at the period end	1,425 consultants	1,099 consultants

¹ Adjusted EBITDA is an alternative performance measure ("APM") used by the Group to assess underlying operating performance. A reconciliation of operating loss to adjusted EBITDA is provided on page 4.

The year ended 31 March 2026 was a period of strong performance and strategic progress for the Group. Revenue increased significantly to £366.1m (2025: £172.8m), driven by the benefit of a full year of trading, robust organic growth and contributions from acquisitions. On an annualised basis, revenue increased by 36.7%, reflecting continued demand for the Group's services across its markets. Organic revenue growth was achieved across all divisions, with particularly strong performance in North America. The acquisitions of Bankside and White Marble in the prior period, together with the acquisition of Auxo Solutions LLC ("Auxo") during the current year, also made material contributions to growth and expanded the Group's capabilities and market presence.

The Group continued to invest in its people to support growth and client delivery. As a result, consultant headcount (excluding contractors) increased to 1,425 as at 31 March 2026 (2025: 1,099).

Gross profit increased to £111.8m (2025: £52.8m), while gross margin remained stable at 30.5% (2025: 30.6%). The maintenance of margins alongside revenue growth demonstrates the scalability of the Group's operating model and continued commercial focus.

Adjusted EBITDA increased to £66.5m (2025: £28.8m), reflecting strong growth in the underlying profitability of the business. The increase was driven by higher revenue, continued cost discipline and the successful integration of acquired businesses. A reconciliation of adjusted EBITDA to the Group's statutory results is provided on page 4.

The Group reported a statutory operating loss of £16.1m (2025: £10.3m loss). This principally reflects non-cash amortisation charges relating to acquired intangible assets together with other accounting charges associated with acquisition consideration liabilities. Loss after tax was £60.0m (2025: £41.8m), after recognising a net finance expense of £54.8m (2025: £33.2m) and a taxation credit of £10.9m (2025: £1.7m). The increase in net finance expense primarily reflects the current year representing a full twelve-month trading period compared with the shorter comparative period. Included within net finance expense is £25.8m (2025: £14.8m) of non-cash interest accrued on amounts owed to a related party.

Operating cash flow improved in the year, generating an inflow of £40.3m (2025: £8.7m outflow), driven by underlying profitability and the continued scaling of the Group. Growth in working capital partially offset this inflow, reflecting the expansion of the business. There remains further opportunity to improve working capital efficiency and enhance cash conversion going forward.

Strategic report (continued)

Business review (continued)

A key strategic milestone during the year was the acquisition of Auxo for initial cash consideration of £32.4m, with additional contingent consideration payable under a two-year earn-out arrangement. Auxo is a technology engineering business specialising in cloud, data and artificial intelligence solutions for the financial services industry. The acquisition strengthens the Group's technology consulting capabilities by combining deep sector expertise with software engineering capabilities, enhancing its ability to deliver integrated transformation and next-generation technology solutions to financial services and insurance clients.

The Group's balance sheet remains strong. Net assets as at 31 March 2026 were £140.6m (2025: £195.8m). The reduction compared with the prior year principally reflects the statutory loss for the year. The Group ended the year with cash balances of £12.2m and significant available headroom under its revolving credit facility, providing flexibility to support future investment and growth.

The directors are pleased with the Group's performance during the year. The business delivered strong revenue growth, increased underlying profitability, successfully executed strategic acquisitions and generated positive operating cash flow. With enhanced capabilities, a leading market position and continued momentum across its operations, the Group is well positioned to deliver further growth and create long-term value in the years ahead.

Reconciliation of operating loss to adjusted EBITDA

	Year ended 31 March 2026 £m	Period ended 31 March 2025 £m
Operating loss	(16.1)	(10.3)
Depreciation	3.7	2.1
Amortisation	27.0	18.6
EBITDA	14.6	10.4
Acquisition consideration accounting charges	34.7	(0.5)
Acquisition-related transaction and integration costs	5.5	16.8
Share-based payment charge	3.3	0.2
Restructuring costs	3.3	0.1
Exceptional remuneration costs	2.3	0.4
Non-cash provisions	1.0	–
Foreign exchange losses	0.9	0.7
Other exceptional costs	0.9	0.7
Adjusted EBITDA	66.5	28.8

Adjusted EBITDA is an alternative performance measure ("APM") used by the Group to assess underlying operating performance. It excludes the effects of financing, taxation, depreciation and amortisation, together with items that management does not consider representative of underlying trading performance, including acquisition-related charges, transaction and integration costs, restructuring costs, share-based payment charges and certain other exceptional or non-cash items.

Management believes adjusted EBITDA provides useful supplementary information to help users understand the Group's underlying trading performance and improve comparability between reporting periods. Adjusted EBITDA is not a measure defined under IFRS and may not be directly comparable with similarly titled measures reported by other entities. It should therefore be considered in addition to, and not as a substitute for, IFRS measures.

Strategic report (continued)

Future developments

Looking ahead, the Group is well positioned to build on its recent success. Continued progress in its core markets, supported by broad-based momentum across divisions, practices and segments, underpins the Group's positive outlook. With clear strategic priorities and a commitment to commercial excellence, the Group remains focused on sustaining growth, deepening client relationships and strengthening its competitive position. Ongoing investment in operational effectiveness and capacity ensures the business is well placed to support future demand and the next phase of growth.

The Group also sees further opportunity to create value through the continued evolution of its operating model and disciplined approach to inorganic growth. Building on recent operational progress and continued development of its acquisition strategy, the Group is well positioned to pursue strategic opportunities that support long-term growth and value creation.

The Group is also pleased with the acquisitions completed after the year end, as described in the directors' report, which further support the Group's strategic objectives and future growth prospects.

Strategy

The Group's strategic vision is to be the best consulting firm in financial services worldwide, covering all sectors, capabilities and major geographies. The strategy to achieve this is aligned to three broad vectors, as set out below, which aim to grow, optimise and transform the business.

The Group is pleased with the progress made against its strategy during the year, as outlined below, and remains confident in its ability to build on this success going forward.

Strategic pillar	Progress in the year	Areas of focus
1. GROW	- Delivered robust organic growth in North America - Strong growth in Insurance, bolstered by the acquisition of Auxo - Significant progress on the acquisition pipeline, with two further deals closing after the year end	- Continued expansion in North America - Development of capabilities and platforms - Ongoing stewardship and execution of the acquisition pipeline
2. OPTIMISE	- Continued focus on commercial excellence initiatives - Ongoing evolution of the operating model to enhance efficiency and scalability - Establishment of a global delivery centre	- Working capital optimisation - Enhancement of commercial and pricing models - Further development of commercial capabilities and governance
3. TRANSFORM	- Launched AI strategy programme with Board mandate - Developed initial functional AI proof of concepts across key areas	- Deploying investment to build on proof of concepts - Embedding Group-wide AI capability through targeted training and upskilling - Drive adoption of AI-enabled ways of working across the Group

Strategic report (continued)

People

People are the Group's most valuable asset, and we take great pride in the exceptional talent and dedication of our global teams. Their expertise enables us to successfully support and deliver some of the most complex and high-profile change and technology programmes within the financial services sector. This continues to help the Group maintain a strong reputation among its expanding client base and within the markets we serve, as evidenced by high levels of repeat clients.

Since the acquisition of Alpha by Bridgepoint, the Group's headcount has continued to grow both organically and through acquisitions. At the end of the year, the Group employed 1,568 (2025: 1,222) people (including administrative staff but excluding contractors), including 158 (2025: 139) partners providing critical leadership within our expanding consulting teams and areas of expertise.

Alpha's employee base continues to grow globally, encompassing an increasingly diverse range of roles including strategy consulting, management consulting, and technology consulting. To support this evolving profile, we continue to refine our development pathways and adapt success frameworks to ensure they are relevant and inclusive. We are also focused on ensuring that mentoring and line management alignments are clear, reinforcing strong leadership across all delivery areas.

We recognise that, as the team expands, intentionally bringing people together becomes more challenging yet increasingly crucial. To address this, we are investing in initiatives to foster connection and collaboration. For example, in London, we are consolidating multiple offices into a single location, creating a central and well-configured hub that will facilitate collaboration, teamwork and social cohesion. Additionally, we are upgrading our technology stack to provide unified systems that enable seamless communication and collaboration across our global workforce.

We are delighted that a significant proportion of our new hires intake in the year came from referrals, indicating that employees consider Alpha as a place to work that they would recommend to their personal and professional contacts. Understanding employee sentiment and responding to feedback remains a top priority.

Based upon recently anonymous feedback results, employee sentiment remains stable across Alpha's divisions. We were pleased to achieve a "good" eNPS rating through the internal engagement survey, alongside a positive perception of working for Alpha compared to competitors. Key strengths identified include our culture and work environment, leadership, opportunity, and growth trajectory. Areas for improvement focus on communication and skills development. Notably, satisfaction scores among newly acquired businesses improved significantly, highlighting our ongoing commitment to integration and support for new teams.

In response to feedback results, we continue to consider and implement tailored action plans across Group-wide, divisional, and regional levels to address specific team needs. For example, at the Group level, we launched a comprehensive communications framework sponsored by senior leadership which includes regular, relevant update meetings for partners and all staff. Additionally, we continue to enhance training programmes that support skill development aligned with employees' roles. During the year, cross-selling training was rolled out for all directors and above, further supporting professional growth. To promote transparency and consistency, we launched the Alpha Employee Handbook, providing accessible and aligned policies across the Group. We also introduced new policies, including fertility-related leave, and expanded existing leave provisions, such as extending child sickness leave following parental leave.

Strategic report (continued)

People (continued)

The Group is committed to providing equal opportunities for all employees and job applicants. We ensure that applications from people with disabilities receive full and fair consideration. Appropriate accommodations are made for disabled employees, including those who become disabled during their employment. Furthermore, we are dedicated to the training and development of disabled personnel, ensuring they have equal access to growth opportunities.

As the Group advances its ambitious growth strategy, we remain committed to preserving our unique expertise, motivating staff to progress long-term careers at Alpha and developing a distinctive, inclusive culture.

Principal risks and uncertainties

The Group's business organisation, and the financial services industry in which it operates, expose it to a number of potential risks arising from internal or external events and actions. The Group therefore manages risk actively and closely in order to limit potential adverse effects on the implementation of its strategy, the financial performance and on the interests of its clients, employees and other stakeholders.

We are committed to evolving the business to remain resilient and successful over the long term, and we have therefore developed certain risk management objectives, which we continue to adhere to:

- Maintaining a strong corporate culture of risk awareness and responsibility embedded at all levels of the organisation,
- Mitigation of ongoing risk as far as possible, without unduly affecting the Group's competitiveness and flexibility, and
- Proactive identification and reporting of risk information, with clear management and mitigation responsibilities.

The Group operates an effective but streamlined approach to risk management. The Group follows a "top-down" and "bottom-up" approach to managing risks. Top-down strategic risk management is directed from the executive team and applied through the actions of the wider senior management, including regional leadership team and operational management. Bottom-up operational risk management is implemented through the engagement, risk awareness and corporate responsibility of all employees, supported by the Group's operations functions. It enables emerging risks to be assessed proactively and ensures that any risks that could impact the fulfilment of the Group's strategic ambition, including growth and diversification, are monitored and managed effectively.

These processes are further supported by relevant internal controls, scenario planning and regular risk reviews, which integrate external market insight with internal perspectives to ensure we maintain a clear and informed view of the risk landscape. As part of its risk processes, the Group also considers the most material current risks and uncertainties.

Strategic report (continued)

Principal risks and uncertainties (continued)

The table below outlines the principal risks faced by the Group and how they are mitigated

Principal risk	Mitigating actions
Competitors Risk that a competitor or new entrant may be able to achieve success and win work from the Group's existing clients. Less mature or more specialist propositions, which the Group chooses to develop, may present less of a competitive advantage.	Continual development and investment in key competitive differentiators, including - Highly focused sector proposition, working exclusively in asset and wealth management, alternatives and insurance sectors - Strong global reputation amongst clients, with the broad and deep expertise, and very high quality of the Group's teams as a key competitive advantage - In developing new specialist propositions, the Group leverages its strong global client relationships and extensive industry insights to earn competitive advantage from an early stage - Monitoring of the market to identify and assess any changes in competitive position, including growth rates and the link between demand and supply overall
Macro Risk that wider market, economic, commercial and financial risks can impact the Group's ability to service clients, their demand for consultancy and technology services and, therefore, the Group's own performance and financial position.	- Monitoring of key business and growth activities within the Group's geographical locations and sectors, while consistently engaging with key internal stakeholders to identify, and plan around, significant trends or events - Regular horizon scanning to identify and assess emerging risks and to ensure an effective, coordinated response to any macro challenges that are identified - Business model that is responsive to change and regularly reviewed, and a proven record of developing the proposition successfully to anticipate and meet client needs - Ongoing diversification and expansion of the service offering, which can reduce the overall impact on the Group of particular restrictions or challenges in certain geographies or markets where the Group operates
Quality of service Failure to maintain quality of service on client delivery engagements	- Clearly defined terms agreed up front, ensuring that each delivery framework is appropriate and the delivery objectives are achievable - Clear client account ownership structures to ensure accountability for client relationships, from opportunity generation, to ongoing monitoring of client satisfaction and fulfilment of agreed delivery criteria - Dynamic and integrated risk management framework to support the Group's focus on delivery excellence, early risk identification and promotes business collaboration on both opportunities and challenges - Close attention to client satisfaction and retention in the market, as well as the generation of re-sell and cross-sell opportunities, demonstrating the strength of the Group's full client proposition suite and consistency of reputation for quality across all business areas

Strategic report (continued)

Principal risks and uncertainties (continued)

Principal risk	Mitigating actions
People Risk of failure to attract, incentivise and retain the best people with the right capabilities across all propositions, levels and geographies. A failure to undertake effective succession planning for key roles could also adversely increase this risk and impact performance	• Unique culture that values diversity, inclusivity, high performance, mentocracy, sociability, and support, accompanied by a broad and responsive support structure – incorporating HR, individual mentors, and external advice schemes – to ensure a continuous focus on our values and culture, alongside a robust set of policies • Rigorous recruitment process, which targets the highest calibre consultants in the industry, demonstrated through the Group's record of attracting top talent versus the competition and increasing headcount • Competitive remuneration package with benefits for career development, recognition, and participation in profit-sharing or cash bonus • Extensive focus on retention, building capabilities, and providing targeted learning and development opportunities with a hyperfocus on support, career development, and effective succession planning
Business strategy Risk that the Group responds inadequately to changing market factors such as technological advancements and strategic growth opportunities, including acquisitions. The success of the Group depends on continuing to develop a proposition that best serves its clients	• Strong visibility of market advancements and growth opportunities, enabled through an effective and coordinated director team working across multiple geographies and sectors, and a roadmap to increase the business both organically and inorganically • Proven ability, through Alpha's successful growth and expansion over 20+ years, to understand the structural drivers of the market, and to innovate and enhance the service offering accordingly, including the development of market-leading technology and data capabilities such as the adoption of AI • Full acquisition due diligence and integration framework, including analysis, planning and mitigation as part of the upfront framework and dedicated integration projects with workstreams across business, commercials and operations for each acquisition • Continuous monitoring of the market for acquisition opportunities that would support the Group's strategy, positively enhance the offering and client satisfaction, and align with the Group's culture and values
Security Risk of cyber-attacks, security breaches and data mishandling, leading to consequent risks to client data, loss of integrity or availability of core data	• A comprehensive suite of data protection and information security policies, overseen by the Information Security function, to monitor and ensure compliance with processing agreements across key stakeholders and suppliers • IT Operations function collaborates with proficient external partners to facilitate the global delivery of the Group's internal and client-facing IT services • Best practice controls to prevent, detect and respond quickly to any cybersecurity events and data handling anomalies • Policies, processes, testing and training are in place to define the standards of control and educate staff on the operating context and potential risks, including the constantly evolving cyber risk landscape

Strategic report (continued)

Principal risks and uncertainties (continued)

In addition to the principal risks disclosed in the table above, the Group is also exposed to other risks that are not considered principal risks. These include geopolitical, technological, regulatory, and financial risks. Further information on the Group's financial risk management is provided in note 22 to the consolidated financial statements.

Environment

As a professional services business, the Group's direct environmental footprint remains relatively low. Nonetheless, we recognise our responsibility to address climate change and environmental impacts more broadly and continue to take practical steps to reduce emissions and embed sustainability across our operations.

In the year, we have continued to strengthen the way we capture and report our emissions data, reflecting our commitment to greater accuracy and transparency in line with evolving best practice and the GHG Protocol. In the year ended 31 March 2026, we have made further strides in the breadth and quality of our Scope 3 reporting. Business travel data, our single largest emission category, has been consolidated from a single reporting source, combining flight, car rental and business travel expenditure to eliminate duplication and provide a more complete picture. We have also refined the boundary between employee commuting and public transport, ensuring journeys are accurately and consistently categorised reporting. In addition, Waste, Fuel & Energy Related Activities and Upstream Transportation & Distribution are reported as clearly defined, discrete categories within the SECR table for the first time. These were previously captured within broader expenditure-based accounting in Normative's methodology. This change reflects improved data granularity and categorisation rather than emissions that were wholly absent from prior-year calculations.

The Group continues to reduce its emissions footprint wherever possible, working with landlords for leased offices to increase renewable energy use, encouraging low-carbon choices around travel, and introducing improvements in waste management. Where emissions cannot yet be avoided, we continue to explore participation in the voluntary biodiversity and carbon markets (BVCM), aligning this with our broader community and charity partnerships for long-term, community-based impact. Our commitment to environmental transparency remains strong, with our EcoVadis submission completed at a global Group level.

In parallel with internal efforts, our Environment, Social and Governance (ESG) and Responsible Investment practice remains a key area of client work. Our consultants continue to support financial services organisations in shaping ESG strategies, navigating regulatory developments, and using technology and data to manage sustainability commitments effectively.

SECR disclosures

The following section sets out the Group's Streamlined Energy and Carbon Reporting (SECR) disclosures, including Group-wide energy use and emissions.

As noted previously in this strategic report, the Group acquired Alpha in the prior period on 19 August 2024. Alpha is engaged in trading activities and is subject to energy and carbon reporting requirements. The Group itself did not undertake any business activity or consume energy prior to this acquisition. To provide meaningful, consistent and comparable SECR disclosures, comparative information has been presented in respect of the underlying Alpha group for the full twelve-month period ended 31 March 2025. The directors consider this approach to provide a complete, representative and comparable view of the Group's environmental impact. Emissions data has been prepared with the support of Normative, the Group's GHG accounting partner.

		UK	Global excl UK	Total	UK	Global excl UK	Total
2 & 3	£m of revenue	140.1	226.0	366.1	116.7	151.1	267.8
	tCO₂e per £m of revenue⁵	14.0	13.3	13.6	12.8	18.7	16.1

1 Business travel (including flights) captures all categorised business travel expenditure including flights, car rental and attributable travel spend, sourced from a single consolidated provider (Normative). Of the 2,809.0 tCO₂e total, 1,801.0 tCO₂e relates to travel spend where the mode of transport could not be fully attributed to a specific category. This is disclosed separately in the sub-row below and is included within the 2,809.0 tCO₂e total and the overall SECR total of 4,964.7 tCO₂e.

2 The 1,801.0 tCO₂e relating to business travel uncategorised by mode represents travel expenditure including accommodation, general travel expenses and multi-mode itineraries where mode attribution was not possible at the time of reporting. It is included in business travel above. From next year, the Group's travel management system launched on 1 April 2026 will provide full mode-level attribution from next year.

Strategic report (continued)

SECR disclosures (continued)

- 3 Employee commuting (excluding working from home) and purchased goods and services were introduced as Scope 3 reporting categories in the prior year and have been reported for the second consecutive year
- 4 Purchased electricity market-based accounting is applied where Guarantees of Origin or equivalent renewable energy certificates are in place. Where location-based data is used, national grid emission factors are applied. The Group does not own or control boilers; purchased heat from building management is classified as Scope 2.
- 5 tCO₂e per £m of revenue is calculated using the total Scope 2 and Scope 3 emissions (4,964.7 tCO₂e) divided by total revenue (£366.1m). For the 2025 comparative, using the full footprint of 5,279 tCO₂e (which includes waste and all business travel), gives an intensity metric of 19.7 tCO₂e per £m. Note: the 2025 SECR-reported table total of 4,318.1 tCO₂e excluded waste and certain business travel categories that have been incorporated into the SECR table for the first time this year.
- 6 The accounting methodology follows the Normative framework and the GHG Protocol Corporate Standard. Emissions factors are sourced from BEIS, Defra, Ecoinvent and other providers. The working from home calculation follows the EcoAct Homeworking Emissions Whitepaper.
- 7 Where activity data has not been available, estimates have been used in line with the GHG Corporate Reporting Methodology.
- 8 Where km travelled have not been recorded in expense systems, a spend-based methodology in line with the GHG Corporate Reporting Methodology has been applied.
- 9 We are dependent on service providers and office management companies for accurate energy data.

The Group's total carbon footprint for the year ended 31 March 2026, prepared with the support of Normative, was 4,964.7 tCO₂e, a reduction of 314.3 tCO₂e (6.0%) on 2025 on a like-for-like basis. The 2025 comparative is the Normative full footprint of 5,279 tCO₂e, which, like the 2026 figure, includes waste and all business travel. The 2025 SECR-reported table total of 4,318.1 tCO₂e reflected a narrower reporting scope in that year. Group revenue increased to £366.1m (+36.7% annualised growth) over the same period. The revenue intensity metric has improved from 19.7 tCO₂e per £m in 2025 to 13.6 tCO₂e per £m in 2026, both calculated on a Normative full-footprint basis, reflecting a decoupling of emissions growth from business growth.

The year-on-year reduction is primarily explained by the following factors:

- Data accuracy and de-duplication: In the prior year, business travel data was captured from multiple reporting streams, resulting in some duplication between public transport and employee commuting categories. This year, all business travel data has been consolidated through Normative from a single source, public transport journeys are clearly separated between business travel and employee commuting, and travel data is sourced exclusively from expense and booking systems. This methodological improvement has removed an element of double-counted emissions from the reported total.
- Home working patterns: Emissions attributed to working from home fell from 321.5 tCO₂e in 2025 to 36.1 tCO₂e in 2026, a reduction of 285.5 tCO₂e, across the Group's global offices, reflecting a shift in working patterns with employees spending more time at office and client locations. It is noted that this reduction is partially offset by corresponding increases in employee commuting emissions (186.3 tCO₂e) and Scope 2 office energy consumption (187.5 tCO₂e, up from 91.2 tCO₂e in 2015), as working from different locations redistributes some emissions across categories rather than eliminating them entirely.
- Categorisation of expenditure-based emissions: Waste, fuel & energy related activities and upstream transportation & distribution are reported as clearly defined, discrete categories within the SECR table for the first time in 2026. In 2025, the expenditure underpinning these categories was captured within broader spend-based calculations in Normative's footprint methodology. 2026 reflects improved data granularity that enables these to be reported separately. This change represents enhanced transparency and categorisation rather than emissions that were absent from 2025's Normative full footprint (5,279 tCO₂e).

Strategic report (continued)

SECR disclosures (continued)

Scope 2 emissions (purchased heat and electricity) increased from 91.2 tCO₂e in the prior year to 187.5 tCO₂e this year, reflecting the greater office energy consumption as the Group's workforce returned to offices in greater numbers and the Group's real estate footprint expanded growth and employees spent more time at office and client locations. Purchased heat totalled 63.3 tCO₂e (2025 28.7 tCO₂e), with energy consumption of 368.7 MWh (2025 148.7 MWh). Purchased electricity totalled 124.2 tCO₂e (2025 62.5 tCO₂e), with consumption of 325.5 MWh (2025 275.2 MWh). We continue to work with landlords and property managers to source renewable energy where available and to improve the quality and granularity of energy consumption data.

Business travel (including flights) remains the Group's single largest emission source at 2,809.0 tCO₂e, representing 56.6% of the total footprint. Within this total, 1,801.0 tCO₂e relates to travel expenditure where the mode of transport could not be fully determined, including accommodation costs, general travel expenses and multi-mode itineraries. This amount is included in the verified total and disclosed separately for transparency.

On 1 April 2026, immediately after the reporting period, the Group launched a travel management system (TMS) through a new travel management partner. The TMS captures all business travel bookings in real time, providing origin-to-destination flight data, flight class, carrier and mode-specific emissions calculations for every trip. From next year onwards, the first full year of TMS operation, the Group will have comprehensive, booking-level data for its largest emission category, enabling a step-change in reporting accuracy, targeted reduction initiatives and the progressive elimination of residual uncategorised travel spend.

Purchased Goods and Services emissions of 1,345.0 tCO₂e (2025 1,303.0 tCO₂e, +3.2%) increased modestly, broadly consistent with business growth and supply chain expansion. Employee commuting (186.3 tCO₂e) and public transport rail (64.5 tCO₂e) reflect employees spending more time at office and client locations, with commuting now more accurately separated from business travel categories. Taxis and car mileage of 157.4 tCO₂e (2025 137.4 tCO₂e, +14.6%) increased in line with greater in-person client activity.

Carbon reduction

Our efforts to reduce carbon emissions include continuing to work with service providers and property managers to expand our purchase of renewable energy globally, as well as working with our clients to minimise business travel wherever practical. Alongside the initiatives of our global CSR team, we continue to raise awareness and educate our people about the environmental impacts of their activities. We encourage our teams to consider measures that could reduce our carbon footprint, such as virtual meeting alternatives, low-carbon travel choices and energy-efficient office behaviour, while continuing to fulfil client relationships and service delivery commitments.

Adherence to mandatory and voluntary reporting initiatives, notably ESOS in the UK, EcoVadis in France and the UK, as well as TCFD and UNGC upkeep globally, all support and help deliver against our environmental strategy, performance and journey towards net zero. Reviewing and expanding our Scope 3 GHG emissions reporting, as demonstrated by the three new categories introduced this year, will form a key part of developing our net zero plans as we continue to increase the understanding and explanation of our carbon footprint. We will use this work to seek further opportunities to reduce the Group's impact on the environment.

Strategic report (continued)

Section 172 statement

Under section 172(1) of the Companies Act 2006, a director of a company must act in the way that they consider, in good faith, would be most likely to promote the success of the company for the benefit of its members as a whole, and in doing so have regard (amongst other matters) to

- The likely consequence of any decision in the long-term,
- The interest of the company's employees,
- The need to foster the company's business relationships with suppliers, customers and others,
- The impact of the company's operations on the community and the environment,
- The desirability of the company maintaining a reputation for high standards of business conduct, and
- The need to act fairly between members of the company

The following disclosures describe how the directors have had regard to the matters set out in section 172(1)(a) to (f) and forms the directors' statement under section 414CZA of the Companies Act 2006

Engagement with key stakeholders

The directors consider the Group's key stakeholders to be its investors, lenders, employees, clients and the communities in which it operates. The board also recognises other stakeholder groups including suppliers, industry bodies and competitors. Engaging effectively with all these stakeholder groups strengthens the Group's business relationships and decision making and, therefore, supports its long-term success.

Stakeholder	Reasons for engagement	Stakeholder key interests	Methods of engagement
Investors	• Ensure alignment of expectations and strategy • Support sustained value creation and capital returns	• Financial performance and capital returns • Sustainable growth • Strong governance and stewardship	• Monthly board meetings • Involvement in key strategic decision making • Periodic portfolio reviews
Lenders	• Maintenance of an optimal capital structure • Borrowings provide liquidity to support the Group's ability to continue as a going concern	• Financial stability and liquidity • Timely repayment of interest and principal	• Annual presentation by the Group's CEO / COO / CFO • Monthly financial reporting • Ad hoc correspondence

Strategic report (continued)

Section 172 statement (continued)

Stakeholder	Reasons for engagement	Stakeholder key interests	Methods of engagement
Employees	• Attracting, retaining and developing talent is essential to the Group's success • The Group is committed to providing a highly rewarding workplace and maintaining a strong, meritocratic, and inclusive culture	• Career progression and development • Engagement and feedback • Reward and recognition • Wellbeing, health and safety • Diversity and inclusion	• Employee feedback and success frameworks • Mentor programme • Training opportunities • Company meetings • Competitive remuneration packages • Diversity and inclusion programme and networks
Clients	• Helping clients to address challenges and capitalise on opportunities is core to the Group's proposition • Building long-term client relationships supports sustainable growth and strengthens the Group's market position	• High-quality deliverables that meet commercial objectives • Efficiency and value for money • Long-term partnerships to help shape clients' businesses for the future	• Senior level client relationship management • Continuous client satisfaction monitoring • Dialogue and round table discussions • Publication of market and industry insights
Communities	• Supporting community development aligns with the Group's values and growth objectives • Promoting positive social and environmental impact through responsible business practices • Engaging with local organisations to identify opportunities for meaningful contribution	• Responsible business practices that minimise harm and maximise positive impact • Meaningful and transparent engagement • Commitment to environmental sustainability and climate action • Support for local causes, charities, and community initiatives	• Diversity and inclusion programme and networks • Energy and carbon reporting • Carbon reduction and offsetting initiatives • Charity of the Year programme • Modern Slavery Statement and Living Wage accreditation • Tax evasion, anti-bribery and whistleblowing policies

Strategic report (continued)

Section 172 statement (continued)

Key board decisions

The key board decisions and considerations in the year ended 31 March 2026 were as follows

Board decision	Considerations
Approval of the Group's annual report and financial statements for the period ended 31 March 2025	• To ensure shareholders and other stakeholders receive fair, balanced and understandable information regarding the Group's performance and financial position • To comply with the Group's reporting obligations and maintain high standards of corporate governance
Approval of the Group's annual budget for the year ended 31 March 2026	• To align financial resources with the Group's strategic priorities • To support investment in growth initiatives while maintaining appropriate profitability and cash generation • To balance short-term financial performance with the long-term interests of shareholders and other stakeholders
Approval of the acquisition of Auxo Solutions LLC in June 2025	• To enhance the long-term growth and success of the Group by incorporating Auxo's deep industry expertise and extensive software engineering capabilities into the Group • To strengthen the Group's service offering and create additional opportunities for employees and clients
Decided final remuneration outcomes in relation to employee bonuses and the allocation of shares issued under the Group's management incentive plan	• To reward employees, supporting retention and engagement while recognising individual and business performance • To drive long-term value by aligning the incentives of senior employees with investors
Strategic investment in value creation plan initiatives to support the Group's strategy, including investments in IT, AI, geographical expansion and the operating model	• To ensure appropriate allocation of resources across the business, balancing investment opportunities with financial discipline • To improve operational efficiency, scalability and service delivery • To support the Group's long-term growth and competitiveness

Directors' report

Results and dividend

The Group made a loss of £60.0m (2025: £41.8m) for the year. A review of business for the year is included in the strategic report.

No dividends were paid or declared in the period. The directors do not recommend the payment of a final dividend in respect of the period ended 31 March 2026.

Directors

The directors that served in office during the period and up to the date of approval of this report are as follows:

C J Kratz
C H Welham
L M J Baqué
D C Sladden
J A W Gooze-Zijl (appointed 9 June 2025)
I L Walsh (appointed 9 June 2025)
J C Paton (resigned 30 June 2025)

Directors' indemnity provision

As permitted by the Articles of Association, the directors have the benefit of an indemnity, which is a qualifying third-party indemnity provision as defined by Section 234 of the Companies Act 2006. The indemnity was in force throughout the period and at the date of approval of this report.

Going concern

The directors have considered the Group's and the Company's ability to continue as a going concern and are satisfied that it is appropriate to prepare the financial statements on a going concern basis. Further detail is provided in note 1 of the consolidated financial statements.

Political donations and expenditure

The Group did not make any political donations or incur any political expenditure in the period.

Financial instruments

The Group's objectives and policies in relation to financial risk management, including its exposure to credit risk, liquidity risk, and market risk, are set out in note 22 to the consolidated financial statements.

Matters covered in the strategic report

In accordance with Section 414C(11) of the Companies Act 2006, the directors have chosen to include certain disclosures in the strategic report as they consider them to be of strategic importance to the Group. These include information on the Group's principal activities, business review, future developments, engagement with employees and suppliers, and environmental matters.

Directors' report (continued)

Auditor

In accordance with section 487(2) of the Companies Act 2006, KPMG LLP will be deemed to continue in office as auditor for the next financial year

Disclosure of information to auditor

Each of the persons who are directors as at the date of approval of this report confirms that

- So far as the director is aware, there is no relevant audit information of which the Company's auditors are unaware, and
- the director has taken all the steps that they ought to have taken as a director in order to make themselves aware of any relevant audit information and to establish that the Company's auditors are aware of that information

Events after the reporting period

After the reporting period, in May 2026, the Group acquired JPSB Group Limited and Elgin White UK Limited. In June 2026, the Group completed a refinancing and raised additional external debt. Further details of these non-adjusting events are provided in note 26 to the consolidated financial statements.

This report was approved by the board of directors and signed on its behalf by

J A W Gooze-Zijl
Director
3 July 2026

Statement of directors' responsibilities

The directors are responsible for preparing the strategic report, the directors' report and the Group and parent Company financial statements in accordance with applicable law and regulations

Company law requires the directors to prepare Group and parent company financial statements for each financial year. Under that law they have elected to prepare the Group financial statements in accordance with UK-adopted international accounting standards and applicable law. They have elected to prepare the parent Company financial statements in accordance with UK accounting standards and applicable law (UK Generally Accepted Accounting Practice), including FRS 101 *Reduced Disclosure Framework*.

Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Group and parent company and of the Group's profit or loss for that period. In preparing each of the Group and parent company financial statements, the directors are required to

- Select suitable accounting policies and then apply them consistently,
- Make judgements and estimates that are reasonable, relevant, and reliable and, in respect of the parent Company financial statements only, prudent,
- For the Group financial statements, state whether they have been prepared in accordance with UK-adopted international accounting standards,
- For the parent Company financial statements, state whether applicable UK accounting standards have been followed, subject to any material departures disclosed and explained in the financial statements
- Assess the Group and parent company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern, and
- Use the going concern basis of accounting unless they either intend to liquidate the Group or the parent Company or to cease operations, or have no realistic alternative but to do so

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the parent Company's transactions and disclose with reasonable accuracy at any time the financial position of the parent Company and enable them to ensure that its financial statements comply with the Companies Act 2006. They are responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error, and have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Group and to prevent and detect fraud and other irregularities.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF ACTIUM TOPCO (UK) LIMITED

Opinion

We have audited the financial statements of Actium Topco (UK) Limited ("the Company") for the year ended 31 March 2026 which comprise the Consolidated statement of comprehensive income, consolidated balance sheet, consolidated statement of changes in equity, consolidated cash flow statement, company balance sheet, company statement of changes in equity and related notes, including the accounting policies in note 1

In our opinion

- the financial statements give a true and fair view of the state of the Group's and of the parent Company's affairs as at 31 March 2026 and of the Group's loss for the year then ended,
- the Group financial statements have been properly prepared in accordance with UK-adopted international accounting standards,
- the parent Company financial statements have been properly prepared in accordance with UK accounting standards, including FRS 101 *Reduced Disclosure Framework*; and
- the financial statements have been prepared in accordance with the requirements of the Companies Act 2006

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities are described below. We have fulfilled our ethical responsibilities under, and are independent of the Group in accordance with, UK ethical requirements including the FRC Ethical Standard. We believe that the audit evidence we have obtained is a sufficient and appropriate basis for our opinion.

Going concern

The directors have prepared the financial statements on the going concern basis as they do not intend to liquidate the Group or the Company or to cease their operations, and as they have concluded that the Group and the Company's financial position means that this is realistic. They have also concluded that there are no material uncertainties that could have cast significant doubt over their ability to continue as a going concern for at least a year from the date of approval of the financial statements ("the going concern period").

In our evaluation of the directors' conclusions, we considered the inherent risks to the Group's business model and analysed how those risks might affect the Group and Company's financial resources or ability to continue operations over the going concern period.

Our conclusions based on this work

- we consider that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate, and
- we have not identified, and concur with the directors' assessment that there is not, a material uncertainty related to events or conditions that, individually or collectively, may cast significant doubt on the Group or the Company's ability to continue as a going concern for the going concern period.

However, as we cannot predict all future events or conditions and as subsequent events may result in outcomes that are inconsistent with judgements that were reasonable at the time they were made, the above conclusions are not a guarantee that the Group or the Company will continue in operation.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF ACTIUM TOPCO (UK) LIMITED
(continued)

Fraud and breaches of laws and regulations – ability to detect

Identifying and responding to risks of material misstatement due to fraud

To identify risks of material misstatement due to fraud ("fraud risks") we assessed events or conditions that could indicate an incentive or pressure to commit fraud or provide an opportunity to commit fraud. Our risk assessment procedures included:

- Enquiring of directors and inspection of policy documentation as to the Group's high-level policies and procedures to prevent and detect fraud, including the Group's channel for "whistleblowing", as well as whether they have knowledge of any actual, suspected or alleged fraud
- Reading Board minutes
- Considering remuneration incentive schemes and performance targets
- Using analytical procedures to identify any unusual or unexpected relationships

We communicated identified fraud risks throughout the audit team and remained alert to any indications of fraud throughout the audit.

As required by auditing standards, we perform procedures to address the risk of management override of controls and the risk of fraudulent revenue recognition, in particular:

- the risk that management may be in a position to make inappropriate accounting entries,
- the risk of bias in accounting estimates, and
- the risk that revenue on milestone projects is overstated through recording revenues in the wrong period

We did not identify any additional fraud risks.

We performed procedures including:

- Identifying journal entries to test based on risk criteria and comparing the identified entries to supporting documentation. These included journal entries with unusual characteristics compared to the total journal population throughout the year, along with any post-closing journals and other adjustments with unusual pairings in respect of entries recorded to revenue, cash or borrowings
- Assessing whether the judgements made in making accounting estimates are indicative of a potential bias
- Selecting revenue projects to test in order to assess whether the revenue recognised in the year ended 31 March 2026 was accurate

Identifying and responding to risks of material misstatement related to compliance with laws and regulations

We identified areas of laws and regulations that could reasonably be expected to have a material effect on the financial statements from our general commercial and sector experience and discussed with the directors and other management the policies and procedures regarding compliance with laws and regulations.

We communicated identified laws and regulations throughout our team and remained alert to any indications of non-compliance throughout the audit.

The potential effect of these laws and regulations on the financial statements varies considerably.

Firstly, the Group is subject to laws and regulations that directly affect the financial statements including financial reporting legislation (including related companies legislation), distributable profits legislation and taxation legislation and we assessed the extent of compliance with these laws and regulations as part of our procedures on the related financial statement items.

**INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF ACTIUM TOPCO (UK) LIMITED
(continued)**

Secondly, the Group is subject to many other laws and regulations where the consequences of non-compliance could have a material effect on amounts or disclosures in the financial statements, for instance through the imposition of fines or litigation. We identified the following areas as those most likely to have such an effect: data protection laws, anti-bribery, employment law, and certain aspects of company legislation recognising the nature of the Group's activities. Auditing standards limit the required audit procedures to identify non-compliance with these laws and regulations to enquiry of the directors and other management and inspection of regulatory and legal correspondence, if any. Therefore if a breach of operational regulations is not disclosed to us or evident from relevant correspondence, an audit will not detect that breach.

Context of the ability of the audit to detect fraud or breaches of law or regulation

Owing to the inherent limitations of an audit, there is an unavoidable risk that we may not have detected some material misstatements in the financial statements, even though we have properly planned and performed our audit in accordance with auditing standards. For example, the further removed non-compliance with laws and regulations is from the events and transactions reflected in the financial statements, the less likely the inherently limited procedures required by auditing standards would identify it.

In addition, as with any audit, there remained a higher risk of non-detection of fraud, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls. Our audit procedures are designed to detect material misstatement. We are not responsible for preventing non-compliance or fraud and cannot be expected to detect non-compliance with all laws and regulations.

Strategic report and directors' report

The directors are responsible for the strategic report and the directors' report. Our opinion on the financial statements does not cover those reports and we do not express an audit opinion thereon.

Our responsibility is to read the strategic report and the directors' report and, in doing so, consider whether, based on our financial statements audit work, the information therein is materially misstated or inconsistent with the financial statements or our audit knowledge. Based solely on that work:

- we have not identified material misstatements in the strategic report and the directors' report,
- in our opinion the information given in those reports for the financial year is consistent with the financial statements, and
- in our opinion those reports have been prepared in accordance with the Companies Act 2006.

Matters on which we are required to report by exception

Under the Companies Act 2006, we are required to report to you if, in our opinion:

- adequate accounting records have not been kept by the parent Company, or returns adequate for our audit have not been received from branches not visited by us, or
- the parent Company financial statements are not in agreement with the accounting records and returns, or
- certain disclosures of directors' remuneration specified by law are not made, or
- we have not received all the information and explanations we require for our audit.

We have nothing to report in these respects.

**INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF ACTIUM TOPCO (UK) LIMITED
(continued)**

Directors' responsibilities

As explained more fully in their statement set out on page 19, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error, assessing the Group and parent Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern, and using the going concern basis of accounting unless they either intend to liquidate the Group or the parent Company or to cease operations, or have no realistic alternative but to do so

Auditor's responsibilities

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue our opinion in an auditor's report. Reasonable assurance is a high level of assurance, but does not guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements

A fuller description of our responsibilities is provided on the FRC's website at www.frc.org.uk/auditorsresponsibilities

The purpose of our audit work and to whom we owe our responsibilities

This report is made solely to the Company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members, as a body, for our audit work, for this report, or for the opinions we have formed

Issued share capital

Issued share capital represents the nominal value of issued and fully paid shares, including both ordinary and priority shares. Details of the Group's issued share capital are provided in note 20.

Share premium

Share premium comprises the excess of consideration received over the nominal value of shares issued, net of directly attributable transaction costs incurred in the issuance of those shares, including both ordinary and priority shares.

Other reserves

Other reserves comprise cumulative exchange differences arising on the translation of foreign operations, the cumulative fair value of equity-settled share-based payments recognised in accordance with IFRS 2, and amounts relating to the repurchase of the Company's own shares by the employee benefit trust.

Retained earnings

Retained earnings represent the cumulative net loss, as recognised in the consolidated statement of comprehensive income, net of dividends and other distributions.

Cash generated / (used) by operations		40,265	(8,715)
Tax paid		(4,647)	(4,634)
Net cash generated / (used) in operating activities		35,618	(13,349)
Cash flows from investing activities			
Interest received		94	129
Acquisition consideration payments, net of cash acquired	10	(43,714)	(604,793)
Additions to internally developed intangible assets		(499)	–
Purchase of property, plant and equipment		(1,138)	(424)
Net cash used in investing activities		(45,257)	(605,088)
Cash flows from financing activities			
Proceeds from issue of shares	20	142	224,568
Proceeds from long-term borrowings (net of loan arrangement fees)		28,893	422,361
Drawdown of short-term borrowings		36,916	8,500
Repayment of short-term borrowings		(37,916)	(7,000)
Interest paid		(18,489)	(12,088)
Repayment of lease liabilities	7	(2,892)	(1,586)
Interest paid on lease liabilities	7	(393)	(225)
Repurchase of own shares		(891)	–
Net cash from financing activities		5,370	634,530
Net (decrease) / increase in cash and cash equivalents		(4,269)	16,093
Cash and cash equivalents at the beginning of the period		15,921	–
Effect of exchange rate movements on cash		528	(172)
Cash and cash equivalents at the end of the period		12,180	15,921

For the purposes of the consolidated cash flow statement, cash and cash equivalents are stated net of overdrafts of £1.7m (2025: £nil), which are repayable on demand and form an integral part of the Group's cash management arrangements. Overdrafts are presented within short-term borrowings in the consolidated balance sheet (note 17).

Notes to the consolidated financial statements

1. General information and accounting policies

General information

Actum Topco (UK) Limited is a private company, limited by shares, incorporated in England and Wales with the registered number 15735478. Its registered office is WeWork, 7th Floor, Moor Place, 1 Fore Street, Moorgate, London, EC2Y 9DT, United Kingdom. The nature of the Group's operations and its principal activities are set out in the strategic report.

Basis of preparation

The financial statements have been prepared on a going concern basis and in accordance with UK-adopted international accounting standards.

The financial statements have been prepared under the historical cost basis, except for certain financial instruments that are measured at fair value. The principal accounting policies applied are set out below.

The presentational currency of the financial statements is pound sterling, and all amounts presented have been rounded to the nearest £1,000, except where otherwise stated.

The Company was incorporated on 22 May 2024, in the prior period. The Group commenced trading on 19 August 2024, the date on which it acquired Alpha Financial Markets Consulting plc. Consequently, the comparative period reflects the results of the Group for the period from 19 August 2024 to 31 March 2025.

Basis of consolidation

These financial statements consolidate the Group's financial position of the Company and its subsidiary undertakings as at 31 March 2026.

The financial results of subsidiaries are fully consolidated from the date of acquisition, being the date on which the Group obtains control, and continue to be consolidated until the date that such control ceases. The financial statements of subsidiaries are prepared for the same reporting period as the parent company, using consistent accounting policies.

All intercompany balances, transactions and unrealised gains and losses arising from intercompany transactions are eliminated in full to ensure the consolidated financial statements reflect the Group as a single economic entity.

Going concern

In assessing the Group's and the Company's ability to continue as a going concern for a period of at least 12 months from the date of approval of these financial statements (the "going concern period"), the directors have considered the Group's projected cash flows, liquidity position and available borrowing facilities.

After the reporting date, the Group completed a refinancing in June 2026, which strengthened its liquidity position. Further details of the refinancing are provided in note 26. Following the refinancing, the Group retains a £50m revolving credit facility and has total available liquidity (comprising cash and undrawn facilities) in excess of £90m.

Notes to the consolidated financial statements (continued)

1 General information and accounting policies (continued)

The directors have prepared detailed cash flow forecasts covering the going concern period. The base case forecast assumes trading performance in line with the Board-approved budget, which reflects continued strong revenue growth in the forthcoming financial year at broadly consistent profit margins. The forecast also incorporates expected non-operating cash flows relating to deferred and contingent consideration for acquisitions, including those completed after the reporting date (as further described in note 26), together with increased interest costs arising from the refinancing. Under the base case, the Group maintains significant headroom against both its liquidity requirements and its financial covenant.

In addition to the base case forecast, the directors have considered the principal risks facing the Group, as set out in the strategic report, and have performed sensitivity analysis including a reverse stress test. The reverse stress test models the level of revenue and profit reduction that would be required before the Group exhausted its liquidity or breached its financial covenant over the going concern period. This analysis indicates that the Group could withstand annualised revenue reductions in excess of 25% and a corresponding reduction in adjusted EBITDA of more than 40% before such outcomes would occur. This scenario also incorporates adverse working capital movements relative to the base case, together with limited passive cost mitigants, including a recruitment freeze and reduced use of contractors. The directors consider this reverse stress scenario to be remote and note that additional active mitigation measures could be implemented if required, further strengthening the Group's resilience.

After careful consideration of the matters set out above, the Directors have a reasonable expectation that the Group and the Company have adequate resources to continue in operational existence for the going concern period. Accordingly, the going concern basis has been adopted in preparing these financial statements.

Significant judgements and estimates

The preparation of financial statements in accordance with IFRS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and reported amounts of assets, liabilities, income and expenses. The following section sets out the Group's significant accounting judgements and major sources of estimation uncertainty.

Judgements

In the process of applying the Group's accounting policies, the directors have made one judgement (excluding those involving estimations), which is considered to have a significant effect on the financial statements.

Revenue recognition

Revenue is the Group's most significant caption in the consolidated statement of comprehensive income. Whilst the majority of the Group's revenue is contracted on a time and materials basis, the Group also has some fixed-price milestone contracts. The recognition of revenue on such contracts involves consideration of the detailed contractual terms against the requirements of IFRS 15. The key judgements include assessment of whether revenue should be recognised over time or at a point in time, and whether the performance obligations under the contract have been met at the balance sheet date, to best reflect the transfer of services through the life of each contract. Further information regarding the methods used to recognise revenue for both time and materials and milestone contracts is provided in the Group's accounting policy, as detailed on pages 37–38. Revenue disclosures are provided in note 2.

Notes to the consolidated financial statements (continued)

1 General information and accounting policies (continued)

Estimates

Several estimates have been made in the preparation of the financial statements. These estimates are based on assumptions derived from historical experience and other factors, including expectations of future events that are considered reasonable under the circumstances. The assumptions form the basis for determining the carrying amounts of assets and liabilities where these are not readily apparent from other sources. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised, and in any future periods affected. Actual results may differ from these estimates.

The directors have identified four significant areas of estimation that have a material effect on the financial statements. These are described below.

Goodwill impairment review

The goodwill impairment review is a major source of estimation uncertainty. Determining the value in use of the relevant groups of cash-generating units ("CGUs") involves significant judgement and estimation. These calculations require management to make assumptions regarding future cash flows, discount rates and long-term growth rates. Although no impairment of goodwill was recognised in the period, a change in these assumptions could lead to a different outcome. Sensitivity disclosures relating to the Group's goodwill impairment review are provided in note 11.

Valuation of intangible assets arising from business acquisitions

The directors have identified the valuation of intangible assets arising from business acquisitions as a significant area involving estimation. However, this is not considered a major source of estimation uncertainty as defined by IAS 1 as there is no significant risk of a material adjustment to the carrying amount within the next financial year. Intangible assets are initially recognised at fair value at the acquisition date, and subsequent remeasurement at fair value is not typically required unless there is an indicator of impairment. Although it is not considered a major source of estimation uncertainty, this estimate is highlighted due to its material effect on the financial statements in the period. Further details of the intangible assets acquired in the period are provided in note 11.

Useful lives of intangible assets

The determination of useful lives for intangible assets is a major source of estimation uncertainty, given the high carrying value of such assets in the Group's balance sheet. Management assesses the estimated useful lives on an asset-by-asset basis, considering factors such as expected usage, technical or commercial obsolescence, and contractual terms. Details of the useful lives applied are disclosed in the accounting policy for intangible assets on page 33. If the useful lives of all intangible assets (excluding order backlog) were reduced by one year, the amortisation expense for the period would have increased by approximately £2.5m.

Notes to the consolidated financial statements (continued)

1 General information and accounting policies (continued)

Contingent acquisition consideration liabilities

The measurement of contingent acquisition consideration liabilities is a significant source of estimation uncertainty. The amount ultimately payable is dependent on the future performance of acquired businesses against agreed earn-out targets and, in certain cases, continued employment of key individuals. In determining the fair value of contingent acquisition consideration liabilities, management estimates the future performance of the acquired businesses over the earn-out period and the resulting expected earn-out payments. These expected payments are discounted to present value using an appropriate discount rate. For employment-linked arrangements, management also estimates the likelihood of relevant employees remaining in employment throughout the vesting period. These estimates are inherently uncertain and may change as actual trading performance, forecasts, market conditions and employee retention expectations evolve. Changes in these assumptions could result in a material adjustment to the carrying amount of contingent acquisition consideration liabilities in future reporting periods. Further details are provided in note 10.

Principal accounting policies

The principal accounting policies adopted in the preparation of these consolidated financial statements are set out below.

Property, plant and equipment

All property, plant and equipment are stated at historical cost (or deemed historical cost) less accumulated depreciation. Cost includes the original purchase price of the asset and the costs directly attributable to bringing the asset to its working condition for its intended use.

Depreciation is applied on all property, plant and equipment at rates calculated to write each asset down to its estimated residual value on a straight-line basis over the following useful lives:

Property, plant and equipment class	Useful life
Fixtures and fittings	3 years
Computer equipment	3 years

Useful lives and estimated residual values are reviewed annually and adjusted as appropriate.

Business acquisitions

Business acquisitions are accounted for as at the acquisition date, which is the date on which control of the business is transferred to the Group. Assets acquired and liabilities assumed in a business acquisition are measured at their fair values at the acquisition date, including any identifiable intangible assets. Goodwill arises when the fair value of the consideration for a business exceeds the fair value of the identifiable net assets acquired. Goodwill and intangible assets arising on the acquisition of a foreign operation are held in local currency and are retranslated into the Group's presentational currency, pound sterling, at each reporting date using the closing foreign exchange rate.

Notes to the consolidated financial statements (continued)

1 General information and accounting policies (continued)

Deferred and contingent acquisition consideration

Deferred and contingent consideration may arise on acquisitions. Deferred consideration arises when settlement of part of the consideration relating to the acquisition falls due after the acquisition date. Contingent consideration arises where consideration is dependent on specified future events or conditions, typically linked to the financial performance of the business acquired.

Deferred and contingent consideration is discounted to present value and recognised as capital investment cost at fair value when the consideration is not employment-linked. Alternatively, where amounts payable are dependent upon future employment, these amounts are recognised as a remuneration expense over the deferral or contingent performance period.

In circumstances where there is an option to settle in the form of cash or a variable number of shares, the Group recognises a financial liability for the fair value of the discounted consideration. Where consideration is settled in a fixed number of shares, the consideration is classified as equity, it is not remeasured, and settlement is accounted for within equity.

Subsequent to the acquisition date, amounts relating to deferred consideration are measured at amortised cost. Contingent consideration liabilities are recognised at fair value through profit or loss.

At each balance sheet date, the fair value of contingent consideration is measured using level 3 inputs in accordance with the fair value hierarchy. These calculations contain estimation uncertainty, as they relate to unknown future cash flows. The key inputs associated with the valuation of these liabilities include the value and timing of expected future earn-out payments (based on the expected financial performance of the relevant businesses), and an appropriate risk-adjusted discount rate to apply to these future cash flows.

Changes in the carrying amount of deferred and contingent consideration liabilities associated with the passage of time are recognised as a finance cost. Other changes to the fair value of the liabilities resulting from changes in the underlying assumptions are recognised in administration costs.

Consideration payments, including all deferred and contingent consideration payments, are reported within investing activities in the consolidated statement of cash flows, except for employment-linked payments, which are reported within operating activities.

Intangible assets

Intangible assets acquired in a business acquisition are identified and recognised separately from goodwill where they meet the definition of an intangible asset under IAS 38. Such assets are only recognised if

- They are capable of being separated or divided from the Group and sold, transferred, licensed, rented or exchanged, either individually or with a related contract or asset, or
- They arise from contractual or other legal rights, regardless of whether those rights are transferrable or separable from the entity or from other rights and obligations.

Notes to the consolidated financial statements (continued)

1 General information and accounting policies (continued)

The cost of intangible assets acquired in a business combination is measured at their fair value as at the acquisition date. To determine this fair value, management estimates the timing and amount of future cash flows attributable to the assets, which are then discounted to present value using a suitable post-tax discount rate. These cash flow projections are based on forecasts available at the acquisition date and are extrapolated over an appropriate period using reasonable growth assumptions. The discount rate reflects current market assessments of the time value of money and the specific risks associated with the asset and the acquired business.

All intangible assets acquired through business acquisitions are amortised over their estimated useful lives. Useful lives are re-assessed at each reporting date.

The classes of intangible assets recognised by the Group, their useful lives and the methods used to determine the fair value of the intangible assets are set out below.

Intangible asset class	Useful life	Valuation method
Customer relationships	9-14 years	Excess earnings method
Brand names	3-20 years	Relief from royalty method
Intellectual property	4-7 years	Relief from royalty / excess earnings method
Order backlog	1 year	Excess earnings method

Impairment of non-financial assets

Goodwill is tested for impairment annually. For impairment testing, goodwill is allocated to each of the Group's cash-generating units ("CGUs") or groups of cash-generating units expected to benefit from the synergies of the related acquisition. The CGUs have been grouped in line with the Group's divisions as this is the level at which goodwill is monitored by management.

The Group performs impairment reviews at the reporting period end to identify any goodwill that has a carrying value that is in excess of its recoverable amount. Determining the recoverability of goodwill requires judgement in both the methodology applied and the key assumptions within that methodology. If it is determined that an impairment is required, the carrying amount of the goodwill is reduced to its recoverable amount with the difference recorded as an impairment charge in the consolidated statement of comprehensive income. Any impairment loss recognised for goodwill is not reversed.

For other non-financial assets (excluding deferred tax assets), the Group assesses whether there is any indication that these assets may be impaired. If any such indication exists, then the asset's recoverable amount is estimated. The recoverable amount of an asset is the greater of its value in use or its fair value, less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

For the purposes of impairment testing, assets that cannot be tested individually are grouped together into the smallest group of assets that generates independent cash inflows (the CGU), that is, cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets.

Notes to the consolidated financial statements (continued)

1 General information and accounting policies (continued)

An impairment loss is recognised if the carrying amount of an asset or its CGU exceeds its estimated recoverable amount. Impairment losses are recognised in the consolidated statement of comprehensive income. Impairment losses recognised in respect of CGUs are allocated first to reduce the carrying amount of any goodwill allocated to the units and then to reduce the carrying amounts of other assets in the CGU (or group of CGUs) on a pro-rata basis.

An impairment loss relating to non-financial assets, excluding goodwill, is reversed if, and only if, the reasons for the impairment have ceased to apply. Impairment losses relating to goodwill are never reversed.

Foreign exchange

Transactions in foreign currencies are translated to the relevant entity's functional currency at the average foreign exchange rate in the month of the transaction. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are retranslated to the functional currency of the relevant entity at the foreign exchange rate ruling at that date. Non-monetary assets and liabilities that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction and are not retranslated. Foreign exchange gains and losses arising on the retranslation of monetary assets and liabilities into functional currency are recognised in administration expenses, or in finance expenses where they relate to borrowings.

The revenue and expenses of foreign operations are translated to the Group's presentational currency, pound sterling, at the average foreign exchange rate in the month of the date of the transactions. The assets and liabilities of foreign operations, including goodwill and intangible assets, are translated to the Group's presentational currency at foreign exchange rates ruling at the balance sheet date. Foreign exchange gains and losses arising on retranslation of assets and liabilities to the Group's presentational currency are recognised in other comprehensive income. These gains and losses may be reclassified subsequently to profit or loss if certain conditions are met.

Financial instruments

The Group has financial instruments including cash and cash equivalents, trade and other receivables, trade and other payables, borrowings, and priority shares. The main purpose of these financial instruments is to fund the Group's business strategy and working capital requirements. Accounting policies for each type of financial instrument are set out below.

Cash and cash equivalents

Cash and cash equivalents comprise cash held in bank accounts. Such balances are measured at amortised cost in accordance with IFRS 9.

Notes to the consolidated financial statements (continued)

1 General information and accounting policies (continued)

Trade and other receivables

Trade and other receivables are recognised initially at fair value, equal to the transaction price, and are subsequently measured at amortised cost less provision for expected credit losses. The trade receivables balances recorded in the Group's consolidated balance sheet are held until realised in cash.

The Group provides services to customers on credit terms with mainly arrears billing, resulting in an element of credit risk. The Group applies the IFRS 9 simplified approach to measure an expected credit loss provision for trade receivables, which involves using a lifetime expected loss allowance. The calculation of expected credit losses begins with grouping trade receivables based on shared credit characteristics, being days past due. Historical loss rates for each ageing category serve as the initial basis for estimating credit losses. These rates are adjusted for macroeconomic conditions, customer-specific factors, and relevant forward-looking information to ensure a comprehensive assessment of potential credit risk. These adjusted rates are applied to the aged trade receivables balance at the reporting date to calculate the expected credit loss provision.

Trade and other payables

Trade and other payables are initially recognised at fair value, equal to the transaction price, and are subsequently measured at amortised cost. Trade and other payables due within one year are not discounted.

Borrowings

Borrowings are initially recognised at fair value, net of directly attributable transaction costs. Given all the Group's borrowings are on market terms, their initial fair value is equal to the amount of proceeds received. Subsequent to initial recognition, borrowings are measured at amortised cost using the effective interest method. Interest expense, including the amortisation of any fees or costs, is recognised in profit or loss over the term of the borrowing using the effective interest rate. Borrowings are derecognised when the related obligation is repaid or extinguished.

Priority shares

The Group's capital structure includes ordinary shares and priority shares. The priority shares are classified as equity, as the Group has an unconditional right to avoid the obligation to deliver cash to the holders. The priority shares do not carry redemption rights, and the associated "priority amount", which accrues on a daily basis and compounds annually at a rate of 12%, is distributable at the discretion of the Group.

Upon the occurrence of certain events (such as a listing, sale, or return of capital), the priority shares rank ahead of ordinary shares in receiving proceeds, including any accrued priority amount. This does not give rise to a financial liability under IAS 32 *Financial Instruments: Presentation*, as the relevant provisions in the Articles of Association govern the allocation of proceeds by a third-party buyer, rather than imposing an obligation on the Group.

Proceeds received from the issue of priority shares are recognised in equity. The accrued priority amount is not recognised as an expense in the consolidated statement of comprehensive income. Any distributions, if made, are recorded as deductions from equity.

Notes to the consolidated financial statements (continued)

1. General information and accounting policies (continued)

Where priority shares are held by an employee and that employee leaves the Group, the priority amount on those shares may be adjusted downwards if the individual is not classified as a "good leaver". In addition, the Group may elect to repurchase the shares, including the settlement of any accrued priority amount. Where such an election is made, the obligation gives rise to a financial liability, and the associated priority amount is recognised as a finance expense in the consolidated statement of comprehensive income. The priority amount payable to the employee is not treated as a distribution because it arises not from the individual's status as a shareholder, but from the substance of the arrangement, effectively compensating the individual for a financing arrangement during their period of service.

Provisions

Provisions are distinct from other liabilities as there is uncertainty over the timing or amount of the cash outflow required to settle the liability. Provisions are measured at the present value of the expenditure expected to be required to settle the obligation. The Group applies a "most likely outcome" approach in valuing these obligations, as this is most appropriate for the type of provisions which the Group holds. These are discounted to present value using an appropriate pre-tax discount rate, where the time value of money is material.

Taxation

Current tax is the amount of income tax payable in respect of the taxable profit for the year, using tax rates enacted or substantively enacted at the balance sheet date, and any adjustment to tax payable in respect of previous years. Current tax is recognised in profit or loss except to the extent that it relates to items recognised in other comprehensive income or directly in equity, in which case the related tax is recognised in the same place.

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences, and deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available against which deductible temporary differences can be utilised. Deferred tax is measured using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date and are expected to apply when the related deferred tax asset is realised or the deferred tax liability is settled.

Deferred tax assets and liabilities are offset only when there is a legally enforceable right to offset current tax assets against current tax liabilities, and there is an intention to settle on a net basis.

Leases

The Group leases office premises on various terms, typically between one to five years. Each lease is assessed individually and may include options to extend or break early. Contracts can include both lease and non-lease components, but only the lease components are accounted for under IFRS 16.

Notes to the consolidated financial statements (continued)

1 General information and accounting policies (continued)

Upon commencement of a lease, the Group recognises a lease liability at the present value of future lease payments, discounted using the interest rate implicit in the lease or, if not available, the Group's *incremental borrowing rate*. The *incremental borrowing rate* reflects the cost the Group would incur to borrow funds for a similar asset. Lease liabilities include payments beyond the non-cancellable period where it is reasonably certain the Group will exercise an extension option or not exercise an early break clause. Lease payments are split between finance expenses and a reduction in the lease liability, with finance costs recognised in the consolidated statement of comprehensive income over the lease term.

Right-of-use assets are initially measured as equal to the lease liability, adjusted for lease incentives and initial direct costs. Right-of-use assets are subsequently depreciated on a straight-line basis over the shorter of the asset's useful life or the lease term.

The Group utilises the exemption available in IFRS 16 for short-term leases (less than 12 months in duration) and low-value leases (for assets worth less than \$5,000 when new). No lease liability or right-of-use asset is recognised for these leases, with lease expenses instead being recognised in administration costs on a straight-line basis over the lease term.

Revenue recognition

Revenue consists of the value of work executed for clients during the period and expenses recharged, exclusive of VAT. Revenue is classified into net fee income and rechargeable expenses. Net fee income represents the Group's personnel, subcontractor and related expertise and services sold to clients. Recharged expenses represent the recharge of costs incidental to fulfilling contracts including flights, subsistence and accommodation on which nil or negligible margin is earned by the Group.

The Group delivers services that have no alternative use to the Group (advice to clients, reports, etc.) as the services are specifically tailored to clients' projects and scope of work. The majority of the Group's revenue is contracted on a time and materials basis, where the performance obligation is to provide consultancy resources at agreed day rates. For such contracts, revenue is recognised over time, as consultant days worked are delivered. Modifications or extensions to such projects are recognised as services are delivered. Contract extensions, where the scope or price of the contract increases, are treated as separate contracts. Contracts accounted for on a time and materials basis are billed incrementally, typically monthly, for incurred time and materials.

Revenue recognition for fixed-fee milestone projects is based on the satisfaction of performance obligations in line with contractual project milestones, depending on the nature of the performance obligations for the project. For most fixed-fee milestone projects, revenue is recognised at a point in time upon delivery of each performance obligation and these projects are typically billed as contractual milestones are delivered and the right to payment exists. Contractual milestones are only treated as separate performance obligations by the Group when they are distinct from the other elements in the contract and could provide a benefit to the customer without further work being completed. In some circumstances, revenue from fixed fee milestone projects is recognised over time where the Group has an enforceable right to payment for performance completed to date, before the contractual milestone has been fully delivered. Material scope changes to fixed-fee milestone projects are managed via a new agreement with the client.

Notes to the consolidated financial statements (continued)

1. General information and accounting policies (continued)

For the Group's Aiviq business, revenue relating to right-to-access software licensing fees is recognised over time, as the benefits of the software are consumed by the customer over the licence period. Associated implementation and other services are recognised in line with the underlying performance obligation, either over the contractual licence period where the associated service is not distinct from the licence, or in line with the work performed where the service provided is deemed distinct from the underlying licence. This assessment is made at a contractual level based on the level of interdependency between the promises in each related contract.

Revenue is wholly attributable to the principal activities of the Group. For all revenue types, payment is typically due between 30 and 60 days after the invoice date or receipt of invoice, depending on the client and region.

Contract receivables

Revenue recognised for performance obligations satisfied but not yet invoiced is recorded as a contract receivable within accrued income, up to the value of the applicable project milestone. Once invoiced, the balance is reclassified to trade receivables.

Contract liabilities

Where amounts invoiced in respect of a contract exceed the revenue recognised for performance obligations satisfied to date, the excess is recorded as a contract liability within deferred income. This is released to revenue in future periods as the performance obligations are satisfied.

Cost of sales

Cost of sales is defined by management as the direct costs associated with the generation of the Group's revenue, including staff payroll and contractor costs that are directly attributable to the delivery of services and supporting growth.

Rechargeable expenses, including travel and subsistence costs directly recharged to clients, are presented separately in the Group's statement of comprehensive income.

Capitalised contract fulfilment costs

Costs directly attributable to the fulfilment of unsatisfied or partially unsatisfied performance obligations are recognised as an asset when they generate or enhance resources of the Group and are expected to be recovered. These costs principally relate to partially completed milestones on fixed-fee contracts, and to non-distinct software implementation activities incurred in advance of the client's licence period on Aiviq contracts. These capitalised costs are recognised in the consolidated statement of comprehensive income at the point of revenue recognition for fixed-fee milestone projects or are amortised over the licence period for non-distinct implementation activities.

Administration expenses

Administration expenses are defined by management as costs incurred by the Group that are not directly associated with the generation of revenue. This includes items such as head office staff costs, recruitment and professional fees and IT services, which are expensed as incurred. Administration expenses exclude finance income and expenses and taxation, which are presented separately in the consolidated statement of comprehensive income.

Notes to the consolidated financial statements (continued)

1 General information and accounting policies (continued)

Defined contribution pension costs

The Group operates defined contribution pension schemes in which the Group pays fixed contributions into a separate fund and has no legal or constructive obligation to pay further amounts. The cost of contributions to these schemes is recognised as an expense in the consolidated statement of comprehensive income in the period in which the employees perform the related work. A liability is recognised in the consolidated balance sheet for any contributions due but not yet paid at the reporting date.

Share-based payments

The Group operates a management incentive plan ("MIP") and a management retention plan ("MRP"), available to certain members of senior management. Awards under the MIP comprise an allocation of "C" and "D" classes of ordinary shares, which are subscribed for by the participant at a subscription price generally below the accounting fair value. Awards under the MRP were awarded for the first time in the year and comprise MRP shares, which subsequently convert to MRP ordinary shares and MRP priority shares upon the occurrence of a "book-up event". This event has already occurred prior to the year end.

Shares awarded under the MIP are intended to be held by employees until a future exit event (a sale of the Company or similar), with vesting conditions in place until such a date. Shares awarded under the MRP are subject to vesting conditions for three and a half years from the subscription date, the vesting period, after which they are treated identically to other employee-held ordinary and priority shares. For shares under both schemes, the Group holds a reacquisition right to repurchase the shares for a variable cash consideration amount where relevant employees leave prior to the end of the vesting period.

The Group has accounted for both the MIP and the MRP as share-based payment arrangements under IFRS 2 *Share-based Payment*, in which the Group has a choice of settlement and there is not considered to be a present obligation to settle in cash. Therefore, subscriptions for shares under these schemes are accounted for as equity-settled share-based payments.

The total expense to be apportioned over the vesting period is determined by reference to the fair value at the date of subscription, less the subscription price paid by the employee. Fair value of the MIP awards is determined using a Monte Carlo simulation model, which incorporates various internal and external factors, including share price volatility, risk-free interest rates, and the expected timing of an exit event. This model simulates a range of possible outcomes to estimate the fair value of the MIP shares at grant date. Fair value of the MRP shares at subscription was determined by reference to a recent arm's-length transaction in the Company's shares.

The share-based payment expense in each period is recognised as an expense in the consolidated statement of comprehensive income, with a corresponding adjustment to equity. At each reporting date, the assumptions in relation to the number of MIP and MRP shares expected to be held upon vesting are adjusted for the effects of non-market-based vesting conditions, primarily relating to personal performance and continued employment, to reflect the Group's best estimate at that date. The impact of any revisions to the original estimates is recognised by adjusting the cumulative expense recognised in the consolidated statement of comprehensive income.

Notes to the consolidated financial statements (continued)

1. General information and accounting policies (continued)

Under the rules of either plan, if the Group exercises its right to reacquire shares upon an employee's departure, it does not expect to repurchase such shares for an amount exceeding their fair value at the date of reacquisition. Accordingly, any repurchase of MIP or MRP shares is accounted for as an equity transaction and is recognised as a deduction from equity.

Other long-term employee benefits

Employee benefits expected to be settled later than twelve months following the accounting period are classified as long-term employee benefits and comprise certain long-term cash bonus incentives allocated to certain employees. These incentives are subject to performance conditions and ongoing employment.

The Group measures the liability for these benefits as the present value of future payments, determined using the projected unit credit method. This involves determining the best estimate of amounts expected to be paid under the scheme, after considering assumptions such as attrition and performance conditions.

The benefit is attributed to units of service on a straight-line basis over the vesting period, reflecting the pattern in which employees deliver the service. A liability is recognised as the employees render service, with a corresponding charge recorded in the consolidated statement of comprehensive income.

The liability is discounted using a rate based on market yields on high quality corporate bonds, with the unwinding of discounting recorded as a finance expense.

Remeasurements of the liability driven by changes in assumptions or the discount rate are recognised in profit or loss in the period they arise.

Other long-term employee benefit liabilities are included within other payables (note 18), except for employment-linked acquisition consideration, which is presented within deferred and contingent consideration (note 10).

Other short-term employee benefits

The Group operates a profit share scheme and other short-term bonus arrangements, which pay a percentage of an employee's salary, subject to Group or divisional financial performance in the related year. These bonuses are accrued at each reporting date based on management's best estimate of the amounts expected to be paid, reflecting current year performance. The associated expense is recognised in the consolidated statement of comprehensive income as an employee benefit cost.

Other short-term employee benefits, including salaries, holiday pay and medical cover, are accrued as the related services are rendered.

Notes to the consolidated financial statements (continued)

1 General information and accounting policies (continued)

New accounting standards and interpretations

There were no changes to the Group's accounting policies in the period. The following amendment became effective in the year, but did not have a material effect on the Group's financial statements:

- Lack of Exchangeability (Amendments to IAS 21), effective from 1 January 2025

The following standards, interpretations and amendments have been issued but were not mandatory for the current accounting period and have therefore not yet been adopted by the Group:

- Amendments to IFRS 9 and IFRS 7 – Amendments to the Classification and Measurement of Financial Instruments, effective from 1 January 2026
- Annual Improvements to IFRS Accounting Standards – Volume 11, effective from 1 January 2026
- Contracts Referencing Nature-dependent Electricity (Amendments to IFRS 9 and IFRS 7), effective from 1 January 2026
- IFRS 18 *Presentation and Disclosures in Financial Statements*, effective from 1 January 2027
- IFRS 19 *Subsidiaries without Public Accountability Disclosures*, effective from 1 January 2027
- Translation to a Hyperinflationary Presentation Currency (Amendments to IAS 21), effective from 1 January 2027

None of these new standards, interpretations or amendments are expected to have a material impact on the Group.

Audit exemptions for UK subsidiaries

Certain of the Company's UK subsidiaries have taken advantage of the parent company guarantee exemption to prepare unaudited accounts in accordance with Section 479A of the Companies Act 2006. The name and registered number of each subsidiary company taking advantage of the audit exemption are shown below:

Subsidiary company	Registered number
Actium Bidco (UK) Limited	15736419
Actium Holdings Limited	09965297
Actium Midco 1 (UK) Limited	15735608
Actium Midco 2 (UK) Limited	15735686
Actium Midco 3 (UK) Limited	15736277
Arviq Limited	11480862
Alpha Alternatives UK Limited	09869494
Alpha Financial Markets Consulting Group Limited	07160664
Alpha Financial Markets Consulting MENA Limited	14638009
Alpha Financial Markets Consulting UK Limited	04710715
Alpha FMC Bidco Limited	09928343
Axxsys Limited	04967647
Bankside Financial Solutions Consulting Limited	11524091
Bankside Payroll Limited	12406540
Obsidian Solutions Ltd	09737564
White Marble Consulting Limited	09027730

A full list of the Company's subsidiary undertakings is disclosed in note 2 of the Company financial statements on pages 81–82.

Notes to the consolidated financial statements (continued)

2. Revenue

Revenue by division

	Year ended 31 March 2026 £'000	Period ended 31 March 2025 £'000
Asset & Wealth Management	219,286	109,438
Alternatives	79,943	45,885
Insurance	46,818	8,832
Strategy & Deals	8,875	3,532
Agency	5,206	2,267
Aviq	5,962	2,876
Total revenue	366,090	172,830

Revenue by geography

	Year ended 31 March 2026 £'000	Period ended 31 March 2025 £'000
UK	140,086	75,322
North America	157,621	63,471
Europe	45,229	24,607
Rest of the world	23,154	9,430
Total revenue	366,090	172,830

Remaining performance obligations

Remaining performance obligations represent the revenue that the Group will earn from certain contracts with customers in future when the Group satisfies performance obligations that are unsatisfied or partially unsatisfied at the reporting date. These mainly relate to Aviq's multi-year software licence contracts with a remaining contractual period of between one and five years, for which software revenue is recognised over time across the access period.

The table below sets out the total transaction price allocated to remaining performance obligations at the reporting date. In line with the practical expedient in IFRS 15, the disclosure excludes performance obligations relating to contracts with an expected original duration of less than one year and contracts where revenue is recognised on a time and expenses basis.

	As at 31 March 2026 £'000	As at 31 March 2025 £'000
To be recognised within one year	5,376	4,139
To be recognised between one and three years	6,963	6,105
To be undertaken and recognised after three years	1,834	2,743
Total remaining performance obligations	14,173	12,987

The movement in contract liabilities in the year is set out in note 15.

Notes to the consolidated financial statements (continued)

3 Operating loss

Operating loss for the year is stated after charging the following expenses

	Note	Year ended 31 March 2026 £'000	Period ended 31 March 2025 £'000
Amortisation of intangible assets	11	26,987	18,625
Depreciation charge	7,12	3,749	2,109
Foreign exchange losses		915	664
Short-term lease expense	7	627	629
Expected credit loss expense on trade receivables		677	87
Staff costs	4	224,165	108,561
Acquisition-related transaction and integration costs		5,454	16,518
Employment-linked acquisition consideration expense	10	29,476	87

The auditor's remuneration for the period was as follows

	Year ended 31 March 2026 £'000	Period ended 31 March 2025 £'000
Audit fees	465	493
Other non-audit services	–	–
Total fees payable to the auditor	465	493

4. Staff costs

The average number of Group employees during the year, excluding contractors, was as follows

	Year ended 31 March 2026 Number	Period ended 31 March 2025 Number
Consulting employees	1,311	1,077
Administration employees	132	120
Average number of employees	1,443	1,197

Total staff costs included in the consolidated statement of comprehensive income during the year were as follows

	Year ended 31 March 2026 £'000	Period ended 31 March 2025 £'000
Wages, salaries and short-term benefits	195,881	94,975
Social security costs	18,226	9,171
Defined contribution pension costs	6,761	4,193
Share-based payment charge	3,297	222
Total staff costs	224,165	108,561

Notes to the consolidated financial statements (continued)

5 Directors' remuneration

The aggregate remuneration of the directors of the Company in the period, as defined by Schedule 5 of The Large and Medium-sized Companies and Groups (Accounts and Reports) Regulations 2008, was as follows

	Year ended 31 March 2026 £'000	Period ended 31 March 2025 £'000
Wages, salaries and short-term benefits	1,656	516
Defined contribution pension contributions	68	29
Aggregate remuneration paid to directors	1,724	545

The highest paid director received total remuneration of £584,000 (2025 £340,000) in the year, of which £23,000 (2025 £27,000) related to defined contribution pension contributions

No directors exercised share options or received any amounts under long-term incentive schemes in relation to qualifying services provided to the Company in the year (2025 none)

Two directors were accruing benefits under defined contribution pension schemes (2025 one)

A fee of £150,000 (2025 £70,000) was payable to Bridgepoint Advisers Limited for making available the services of certain directors during the year. This fee is excluded from the amounts disclosed in the table above

6. Finance expense

	Note	Year ended 31 March 2026 £'000	Period ended 31 March 2025 £'000
Interest on external borrowings		23,713	13,922
Amortisation of loan arrangement fees		844	446
Foreign exchange loss on borrowings		1,992	2,253
Fair value gain on derivative financial instruments		(722)	–
Interest on investor loan notes		25,774	14,795
Unwind of discounting on deferred and contingent acquisition consideration	10	2,809	1,669
Interest expense on lease liabilities	7	393	225
Other finance expense		122	–
Total finance expense		54,925	33,310

Interest on external borrowings comprises interest on the facility B term loans, revolving credit facility and acquisition and capital expenditure facility. This interest is settled in cash on a regular basis, typically every six months.

Interest on investor loan notes may be settled in cash or be allowed to compound annually, at the Group's discretion. As at 31 March 2026, no accrued interest had been settled in cash.

Further details of the Group's borrowings are provided in note 17.

Notes to the consolidated financial statements (continued)

7 Leases

Right-of-use assets

	Offices £'000
Net book value	
As at 22 May 2024	–
Business acquisitions (note 10)	4,177
Additions	188
Depreciation charge	(1,693)
Foreign exchange movements	(28)
As at 31 March 2025	2,644
Additions	2,592
Lease modifications	939
Depreciation charge	(3,066)
Foreign exchange movements	25
As at 31 March 2026	3,134

Lease liabilities

	As at 31 March 2026 £'000	As at 31 March 2025 £'000
Due within one year	1,833	2,123
Due between one year and five years	2,034	867
Due after five years	–	–
Total lease liabilities – undiscounted	3,867	2,990
Effect of discounting	(464)	(231)
Total lease liabilities – discounted	3,403	2,759
Represented by		
Current	1,600	1,953
Non-current	1,803	806
Total lease liabilities – discounted	3,403	2,759

During the year, the Group entered into a non-cancellable lease agreement for office premises in the UK commencing in July 2026 and expiring in June 2029. As the lease had not commenced at the reporting date, no lease liability or right-of-use asset has been recognised in these financial statements. The lease gives rise to total undiscounted committed lease payments of £9.6m, which are not reflected in the lease liabilities above.

Notes to the consolidated financial statements (continued)

7 Leases (continued)

Amounts recognised in the consolidated statement of comprehensive income

	Year ended 31 March 2026 £'000	Period ended 31 March 2025 £'000
Depreciation of right-of-use assets	3,066	1,693
Short-term lease expense	627	629
Variable service charges	97	47
Included in administration expenses	3,790	2,369
Interest expense on lease liabilities	393	225
Included in finance expenses	393	225

Total lease payments made in the year amounted to £3.9m (2025: £2.4m), of which £3.3m (2025: £1.8m) related to lease liabilities and £0.6m (2025: £0.6m) related to short-term leases.

The Group has no material income or expenses associated with sub-leasing arrangements, sale-and-leaseback transactions, or variable lease payments.

8 Taxation

	Year ended 31 March 2026 £'000	Period ended 31 March 2025 £'000
Current tax		
Current tax on profits/losses for the period	9,196	1,919
Adjustments in respect of prior periods	(2,494)	–
Deferred tax		
Origination and reversal of temporary differences	(18,255)	(3,604)
Effect of changes in tax rates	1,282	–
Adjustments in respect of prior periods	(626)	–
Total taxation credit for the period	(10,897)	(1,685)

Notes to the consolidated financial statements (continued)

8. Taxation (continued)

The difference between the total tax expense shown above and the amount calculated by applying the standard UK corporate tax rate to the Group's loss before tax is explained as follows

	Year ended 31 March 2026 £'000	Period ended 31 March 2025 £'000
Loss before tax	(70,939)	(43,463)
Tax at the standard UK corporation tax rate of 25%	(17,735)	(10,866)
Effects of		
Expenses not deductible for taxation	4,400	5,182
Non-deductible interest	4,708	3,977
Effect of tax rates in foreign jurisdictions	(527)	(90)
Effect of changes in tax rates	1,282	–
Withholding and other local taxes	95	112
Adjustments in respect of prior periods – current tax	(2,494)	–
Adjustments in respect of prior periods – deferred tax	(626)	–
Total taxation credit for the period	(10,897)	(1,685)

The effective tax rate of 15% (2025: 4%) reflects a tax credit which is lower than would be expected if the loss before tax were relieved at the UK corporation tax rate of 25%. This is primarily due to permanent differences, including the non-deductibility of share-based payment charges and certain business acquisition-related costs, together with restrictions on interest deductibility under applicable tax legislation.

9. Deferred tax

Year ended 31 March 2026

	As at 1 April 2025	Business acquisitions £'000	Recognised in profit or loss £'000	Exchange differences £'000	As at 31 March 2026 £'000
Goodwill and intangible assets	(65,103)	201	5,298	(80)	(59,684)
Property, plant and equipment	(134)	–	(80)	(1)	(215)
Interest restriction	762	–	759	(2)	1,519
Tax losses	6,386	–	2,121	(9)	8,498
Other temporary differences	1,718	–	9,501	(19)	11,200
Net deferred tax liabilities	(56,371)	201	17,599	(111)	(38,682)

Notes to the consolidated financial statements (continued)

9 Deferred tax (continued)

Period ended 31 March 2025

	As at 22 May 2024	Business acquisitions £'000	Recognised in profit or loss £'000	Exchange differences £'000	As at 31 March 2025 £'000
Intangible assets	–	(70,065)	4,706	256	(65,103)
Property, plant and equipment	–	(138)	4	–	(134)
Interest restriction	–	–	762	–	762
Tax losses	–	8,481	(2,094)	(1)	6,386
Other temporary differences	–	1,494	226	(2)	1,718
Net deferred tax liabilities	–	(60,228)	3,604	253	(56,371)

Deferred tax assets and liabilities are offset in the consolidated balance sheet only when there is a legally enforceable right to offset current tax assets against current tax liabilities and an intention to settle on a net basis. In all jurisdictions where the Group operates, sufficient deferred tax liabilities exist to offset the deferred tax assets, and accordingly, all deferred tax assets have been offset against the related deferred tax liabilities. As a result, no deferred tax assets are presented separately in the consolidated balance sheet.

10 Business acquisitions

Business acquisitions during the year ended 31 March 2026

In June 2025, the Group acquired 100% of the equity in Auxo Solutions LLC ("Auxo"), a leading technology engineering company specialising in modern enterprise solutions, cloud, data and AI for the financial services industry. The acquisition strengthens Alpha's full-service technology consulting capabilities for financial services and insurance clients by combining deep industry expertise with software engineering capabilities. It also enhances the Group's ability to deliver integrated strategy, transformation and next-generation technology solutions to clients.

The assets and liabilities acquired on the acquisition date were as follows:

	£'000
Intangible assets – customer relationships	14,304
Intangible assets – brand names	1,072
Intangible assets – intellectual property	948
Intangible assets – order backlog	1,133
Property, plant and equipment	9
Trade and other receivables	5,574
Cash and cash equivalents	2,569
Trade and other payables	(2,106)
Provisions	(356)
Deferred tax assets	201
Net identifiable assets acquired	23,348
Consideration	32,431
Goodwill on acquisition	9,083

Notes to the consolidated financial statements (continued)

10 Business acquisitions (continued)

Goodwill of £9.1m arising from the acquisition primarily reflects the value of the assembled workforce, expected synergies with the Group's existing Insurance division, and anticipated future growth opportunities. All the goodwill recognised is expected to be deductible for corporation tax purposes.

Consideration of £32.4m comprised cash consideration, which was settled in full during the year.

Under the acquisition agreement, additional amounts of up to \$30.0m may become payable in two instalments of \$15.0m in July 2026 and July 2027, contingent upon both the continued employment of the recipients and Auxo achieving defined financial performance targets. In addition, up to a further \$50.0m may become payable in two instalments, subject to continued employment and more challenging financial performance targets over the same timeframe. Given the linkage to continued employment, the Group has concluded that these arrangements represent remuneration for post-combination services rather than consideration transferred in the business combination. Accordingly, these amounts are accounted for under IAS 19 as other long-term employee benefits. The Group also issued MRP shares in connection with the acquisition, details of which are provided in note 21.

The gross amount of trade and other receivables acquired was £6.1m. An expected credit loss provision of £0.5m was recognised on acquisition, representing the Group's best estimate of contractual cash flows not expected to be collected. The fair value of the acquired receivables is estimated as £5.6m, which is equal to the gross amount less the expected credit loss provision.

Auxo contributed £30.4m to the Group's revenue and £5.9m in profit after tax in the year ended 31 March 2026, including the amortisation of related acquired intangible assets. If the acquisition of Auxo had been completed at the start of the reporting period, the Group's revenue for the period would have been £374.8m and its loss after tax would have been £57.0m, excluding any adjustments relating to the amortisation of intangible assets in the pre-acquisition period.

Notes to the consolidated financial statements (continued)

10 Business acquisitions (continued)

Business acquisitions during the period ended 31 March 2025

During the period ended 31 March 2025, the Group acquired Alpha Financial Markets Consulting plc ("Alpha"), White Marble Group Limited ("White Marble") and Bankside Financial Solutions Consulting Limited ("Bankside")

Assets and liabilities acquired

	Alpha £'000	White Marble £'000	Bankside £'000	Total £'000
Intangible assets – customer relationships	223,957	1,257	6,502	231,716

Total consideration	625,895	3,470	17,831	647,196

Notes to the consolidated financial statements (continued)

10. Business acquisitions (continued)

Acquisition of Alpha

In August 2024, the Group acquired 100% of the issued share capital of Alpha Financial Markets Consulting plc ("Alpha"). The Group views Alpha as a leading independent specialist, operating in the large and growing financial services consulting market, importantly with a distinct culture and a high calibre team of professionals. The sector is expected to benefit from long-term growth drivers, including digital transformation, increasing financial services regulation, evolving product complexity, cost pressures and continued growth in assets under management.

Goodwill of £400.8m arising from the acquisition primarily reflects the value of the acquired workforce, the profitability of the business, its established experience in the specialist financial services consulting sector, and anticipated future growth opportunities. None of the goodwill is expected to be deductible for tax purposes.

The total consideration for the acquisition amounted to £625.9m and was fully settled on completion. Of this amount, £611.7m was paid in cash, and £14.2m was satisfied through a share-for-share exchange, whereby certain members of Alpha's senior management received shares in Actium Topco (UK) Limited in exchange for their shareholdings in Alpha. There is no deferred or contingent consideration associated with the acquisition.

The gross amount of trade and other receivables acquired was £57.8m. An expected credit loss provision of £0.6m was recognised on acquisition, representing the Group's best estimate of contractual cash flows not expected to be collected. The fair value of the acquired receivables is estimated as £57.2m, which is equal to the gross amount less the expected credit loss provision.

Acquisition of White Marble

In September 2024, the Group acquired 100% of the issued share capital of White Marble Group Limited ("White Marble"), a specialist marketing consultancy firm to asset management, wealth management and alternatives clients. This acquisition extends the Group's specialist sector-focused offering, and the combined expertise of White Marble and the Group creates a holistic range of client solutions from brand strategy to supporting go-to-market projects, to end-to-end digital and creative services support. The acquisition enables the Group to build a leading marketing, brand and creative agency proposition to financial services clients globally. White Marble was re-branded to Alpha Agency after the acquisition date.

Goodwill of £2.6m arising from the acquisition primarily reflects the expected synergies from integrating White Marble into the Group, as well as the value of the acquired workforce and anticipated future growth opportunities. None of the goodwill is expected to be deductible for tax purposes.

The acquired trade and other receivables are recognised at fair value, which is equal to their gross amount of £0.5m as no material credit losses were expected.

The maximum potential cash consideration payable by the Group under the acquisition agreement is £6.1m, comprising £1.4m of initial cash consideration paid on completion and up to £4.7m in contingent earn-out payments. The earn-out is linked to White Marble's financial performance against specified profit targets over a three-year earn-out period, and may be settled in up to three instalments, with the final payment due in June 2028.

Notes to the consolidated financial statements (continued)

10 Business acquisitions (continued)

The total consideration recognised at the acquisition date was £3.5m, consisting of £1.4m of cash paid on completion and £2.1m representing the fair value of contingent consideration. The fair value of the contingent consideration was determined by discounting the expected future payments, which are based on management's expectations of how the acquired business will perform against the earn-out targets, using a risk-adjusted discount rate of 22.5%.

As at 31 March 2026, the discounted fair value of remaining contingent consideration was £3.6m.

Acquisition of Bankside

On 4 September 2024, the Group acquired 100% of the issued share capital of Bankside Financial Solutions Consulting Limited ("Bankside"), a UK based technology consulting firm providing specialist data integration services to the asset and wealth management sector. The combination of the Group's leading consulting capability for the asset and wealth management sector, and the Bankside team's deep expertise and toolsets, enhanced the Group's competitive end-to-end offering for clients through large-scale and complex technical implementations.

Goodwill of £12.3m arising from the acquisition primarily reflects the expected synergies from integrating Bankside into the Group, the value of the acquired workforce, the profitability of the business and anticipated future growth opportunities. None of the goodwill is expected to be deductible for tax purposes.

The acquired trade and other receivables are recognised at fair value, which is equal to their gross amount of £1.7m as no material credit losses were expected.

The maximum potential cash consideration payable by the Group under the acquisition agreement is £25.1m, comprising £6.3m of initial cash consideration paid on completion and up to £18.8m in contingent earn-out payments. The earn-out is linked to Bankside's financial performance against specified profit targets over a three-year earn-out period and may be settled in multiple instalments across four years, with the final payment due in August 2028.

The total consideration recognised at the acquisition date was £17.8m, consisting of £6.3m of cash paid on completion and £11.5m representing the fair value of contingent consideration. The fair value of the contingent consideration was determined by discounting the expected future payments, which are based on management's expectations of how the acquired business will perform against the earn-out targets, using an original risk-adjusted discount rate of 21.0%.

During the year ended 31 March 2026, accelerated earn-out payments of £13.2m were made, reflecting strong post-acquisition performance. As at 31 March 2026, the discounted fair value of the remaining contingent consideration was £5.1m. The discount rate applied in determining the fair value of the contingent consideration has been reduced to 4.9%, reflecting the directors' assessment that settlement of the remaining contingent consideration is highly probable based on the current and expected future performance of the business, resulting in a reduction in the level of risk associated with the expected cash flows.

Notes to the consolidated financial statements (continued)

10 Business acquisitions (continued)

Contribution of acquired businesses to revenue and profit for the period ended 31 March 2025

In aggregate, the Alpha, White Marble and Bankside acquisitions contributed all of the Group's revenue and a profit after tax of £5.2m in the period ended 31 March 2025. The newly established holding companies contributed a loss after tax of £47.0m in the same period, resulting in a total Group loss after tax of £41.8m. If the acquisitions had all been completed at the start of the reporting period on 22 May 2024, the Group's revenue for the period would have been £238.1m and its loss after tax would have been £55.6m, excluding any adjustments relating to the amortisation of intangible assets in the pre-acquisition period.

Movements in deferred and contingent consideration

	Auxo £'000	Bankside £'000	White Marble £'000	Shoreline £'000	Lionpoint £'000	Total £'000

Foreign exchange movements	543	–	–	(21)	–	522
As at 31 March 2026	30,374	5,069	3,597	233	29	39,302
Represented by						
Non-current	8,295	5,069	2,361	233	–	15,958
Current	22,079	–	1,236	–	29	23,344
As at 31 March 2026	30,374	5,069	3,597	233	29	39,302

An element of the acquisition consideration associated with Auxo, Lionpoint and Shoreline is employment-linked. These amounts are accrued over time, with £29.5m recognised as a remuneration expense within administration expenses in the year. A further £0.6m has been recognised in accruals for associated employer's social security costs.

The unwind of discounting of £2.8m has been recognised within finance expenses. The fair value adjustment of £4.6m has been recognised within administrative expenses. This fair value adjustment primarily reflects the acceleration of Bankside contingent consideration payments in the period, and a reduction in the discount rate applied in determining the remaining liability, driven by the strong post-acquisition performance of the business.

As at 31 March 2026, the total liability of £39.3m relates entirely to contingent consideration, with no deferred consideration remaining.

The value of the employment-linked contingent consideration liability relating to Auxo is subject to significant estimation uncertainty, as it is dependent on forecast future financial performance. A reasonably possible scenario in which Auxo's future financial performance remains at current levels, rather than increasing in line with management's forecasts, would result in the liability at 31 March 2026 decreasing by £4.3m to £26.2m. No material estimation uncertainty has been identified in relation to the Group's other contingent consideration liabilities.

Notes to the consolidated financial statements (continued)

11. Goodwill and intangible assets

Goodwill

	£'000
Cost	
As at 22 May 2024	–
Business acquisitions (note 10)	415,704
Foreign exchange movements	(1,777)
As at 31 March 2025	413,927
Business acquisitions (note 10)	9,083
Foreign exchange movements	840
As at 31 March 2026	423,850

Goodwill represents the excess of the cost of an acquisition over the fair value of the Group's share of the net identifiable assets of the acquired subsidiary at the date of acquisition. Goodwill arising on the acquisition of a foreign operation is recorded in the functional currency of that foreign operation and is retranslated into the Group's presentational currency at each reporting date using the closing foreign exchange rate.

The goodwill recognised in the year is attributable to the acquisition of Auxo Solutions LLC. Refer to note 10 for further details.

Allocation of goodwill to cash-generating units

Goodwill has been allocated to the Group's divisions, as shown in the table below. These divisions represent groups of cash-generating units ("CGUs"), consistent with how the Group manages and monitors its operations. For simplicity, these groups of CGUs are referred to as CGUs throughout this note.

	As at 31 March 2026 £'000	As at 31 March 2025 £'000
Asset & Wealth Management	247,473	228,779
Alternatives	120,080	135,038
Insurance	39,543	33,356
Strategy & Deals	11,656	11,656
Agency	2,563	2,563
Aiviq	2,535	2,535
Group	423,850	413,927

During the year, £17.5m of goodwill was reallocated from Insurance to Asset & Wealth Management and £14.2m of goodwill from Alternatives to Insurance. These reallocations reflect changes in the presentation of certain sub-teams within the Group's internal reporting structure used for board reporting purposes.

Notes to the consolidated financial statements (continued)

11 Goodwill and intangible assets (continued)

Impairment review

The carrying amount of goodwill is not subject to systematic amortisation but is instead reviewed annually for impairment. The review assesses each CGU to which goodwill has been allocated by comparing the carrying amount of the CGU, including goodwill, with the recoverable amount of the CGU. Deferred tax liabilities arising on acquired intangible assets are included within the carrying amount of each CGU for the purposes of the impairment review. Including these deferred tax liabilities within the CGU carrying amount is consistent with the treatment of goodwill arising on acquisition under IFRS 3 *Business Combinations* and avoids a notional impairment immediately following acquisition that does not reflect a change in the recoverable amount of the CGUs.

The recoverable amount of each CGU has been assessed by reference to value in use, which is estimated using cash flows from forecasts prepared by management around the balance sheet date. The key assumptions considered to be individually significant for the purposes of calculating the value in use of each CGU include future growth rates, profit margins and the pre-tax discount rates used to convert the estimated cash flows to present value.

The board-approved budget for the year ended 31 March 2027 forms the basis for the cash flow projections for each CGU. The cash flow projections for the following four years reflect the directors' expectations of the medium-term operating performance of the CGU and the growth prospects in the relevant market. The factors considered in relation to each CGU include the size of the CGU, the maturity of its operations, its market share and the Group's strategic pillars. Thereafter, a long-term growth rate is applied to the terminal period, reflecting the long-term outlook for each CGU.

To determine the recoverable amount of each CGU, future cash flows have been discounted to their present value using CGU-specific pre-tax discount rates. These rates reflect current market assessments of the time value of money and the risks specific to each CGU, including the geographic regions in which the CGU operates and the nature, maturity, and stability of its operations.

The cash flow projections are stated on a nominal basis, incorporating expected inflationary effects over the forecast period to ensure consistency with the nominal discount rates applied. The Group has also considered costs in relation to climate change when forecasting future cash flows.

Sensitivity analysis

Given the level of goodwill recognised in the consolidated balance, the impairment review is sensitive to reasonably possible changes in the key assumptions used in determining the recoverable amount of each CGU. The key assumptions are as follows:

- **Medium-term growth rate** the rate at which adjusted earnings before interest, tax, depreciation and amortisation ("EBITDA") is expected to grow in years two to five of the forecast period
- **Long-term growth rate** the rate at which adjusted EBITDA is assumed to grow in perpetuity, used to determine the terminal value
- **Pre-tax discount rate** the rate used to discount forecast cash flows to present value, reflecting a market participant's view of the weighted average cost of capital

Notes to the consolidated financial statements (continued)

11. Goodwill and intangible assets (continued)

The following table presents, for each CGU, the impairment headroom (being the amount by which recoverable amount exceeds carrying amount), the values assigned to each of the key assumptions, and, where reasonably possible, the change in each assumption that would reduce headroom to nil

CGU	Impairment headroom £'000	Key assumptions			Reasonably possible change in assumptions required to reduce headroom to nil		
		Medium-term growth rate	Long-term growth rate	Pre-tax discount rate	Medium-term growth rate	Long-term growth rate	Pre-tax discount rate

Notes to the consolidated financial statements (continued)

11 Goodwill and intangible assets (continued)

Customer relationships

Customer relationships represent the value attributed to the Group's established and stable customer base acquired through business acquisitions

The fair value of customer relationships is determined at the acquisition date using the excess earnings method. This approach calculates the present value of the earnings attributable to the customer relationships, after deducting a reasonable return on other contributory assets. Key assumptions used in the valuation include forecast revenue growth from existing customers, expected profit margins, the customer attrition rate and an appropriate discount rate.

Customer relationships are amortised over their estimated useful lives, which range from 9 to 14 years, reflecting the period over which the customer relationships are expected to materially contribute to the Group's earnings.

Brand names

Brand names represent the value attributed to the Alpha, Aviq and Lionpoint brand names acquired through business acquisitions.

The fair value of brand names is determined at the acquisition date using the relief-from-royalty method. This approach estimates the present value of the notional royalty payments the Group would be willing to make to license the brand names if they were not owned. Key assumptions in the valuation include the selected royalty rate, forecast revenue attributable to each brand name, and an appropriate discount rate.

Brand names are amortised over their estimated useful lives, which range from 3 to 20 years. The amortisation period reflects the strength of each brand and the expected duration over which they will generate economic benefits for the Group.

The Lionpoint brand was rebranded to Alpha Alternatives shortly after the acquisition in the period ended 31 March 2025. As a result, the Lionpoint brand name was recognised as a defensive intangible asset with a short useful life of 3 years.

Intellectual property

Intellectual property represents the value of proprietary technology and software assets acquired through business acquisitions, including the Aviq software platform.

The fair value of intellectual property intangible assets is determined at the acquisition date using an income approach – either the excess earnings method or the relief-from-royalty method – depending on the nature of the technology. Further details on the application of these methodologies and the key assumptions used are provided in the "customer relationships" and "brand names" sections above.

Intellectual property intangible assets are amortised over their estimated useful lives, which range from 4 to 7 years, reflecting the anticipated rate of technological obsolescence and the timeframe over which the assets are expected to generate economic benefits for the Group.

Notes to the consolidated financial statements (continued)

11 Goodwill and intangible assets (continued)

Order backlog

The order backlog represents the value attributed to committed contracts with customers that have been acquired through business acquisitions

The fair value of the order backlog is determined at the acquisition date using the excess earnings method. This approach calculates the present value of the earnings attributable to the order backlog, after deducting a reasonable return on other contributory assets. Key inputs used in the valuation include contracted revenue, expected profit margins, and an appropriate discount rate.

The order backlog is amortised over its useful life of up to one year, reflecting the expected period over which the contracts will be fulfilled.

12. Property, plant and equipment

	Fixtures & fittings £'000	Computer equipment £'000	Total £'000
Cost

13 Trade and other receivables

	As at 31 March 2026 £'000	As at 31 March 2025 £'000
Trade receivables	71,165	47,613
Less allowance for expected credit losses	(1,882)	(693)
Trade receivables – net	69,283	46,920
Accrued income	21,797	12,799
Other receivables	3,318	2,832
Prepayments	3,535	2,984
Capitalised contract fulfilment costs	703	667
Total trade and other receivables – current	98,636	66,202

Trade receivables are non-interest bearing and generally have a 30 to 60-day term. Due to their short maturities, the carrying amount of trade and other receivables is a reasonable approximation of their fair value.

The Group recognises expected credit losses on trade receivables using a provision matrix, which is based on historical credit loss experience adjusted for forward-looking factors. Historical loss rates are determined separately for each ageing category through a detailed analysis of historical credit losses by territory. Forward-looking factors include both macroeconomic conditions and specific risk indicators relevant to the Group's customers. Trade receivables identified as individually impaired are assessed separately from the provision matrix and are fully provided for where recovery is considered unlikely.

Expected credit losses as at 31 March 2026

	Expected loss rate %	Gross carrying amount £'000	Expected credit loss provision £'000	Net carrying amount £'000
Not overdue	1.1%	38,830	(421)	38,409
Overdue 1-30 days	1.9%	18,310	(349)	17,961
Overdue 31-60 days	2.5%	6,956	(173)	6,783
Overdue 61-90 days	4.6%	1,354	(62)	1,292
Overdue 90+ days	8.9%	5,309	(471)	4,838
Portfolio-based expected credit losses		70,759	(1,476)	69,283
Individually assessed trade receivables	100%	406	(406)	–
Total expected credit losses		71,165	(1,882)	69,283

Notes to the consolidated financial statements (continued)

13 Trade and other receivables (continued)

Expected credit losses as at 31 March 2025

	Expected loss rate %	Gross carrying amount £'000	Expected credit loss provision £'000	Net carrying amount £'000
Not overdue	0.9%	31,973	(291)	31,682
Overdue 1-30 days	1.5%	11,436	(168)	11,268
Overdue 31-60 days	2.2%	1,635	(36)	1,599
Overdue 61-90 days	4.8%	609	(29)	580
Overdue 90+ days	8.6%	1,960	(169)	1,791
Total expected credit losses		47,613	(693)	46,920

Capitalised contract fulfilment costs comprise amounts incurred in relation to unsatisfied performance obligations on fixed-fee milestone projects and software implementation costs incurred in advance of the commencement of the client's licence period on Aiviq contracts. As at 31 March 2026, total capitalised contract fulfilment costs were £1.0m (2025: £0.9m), of which £0.3m (2025: £0.2m) was presented within non-current assets on the face of the consolidated balance sheet. These costs are recognised in the consolidated statement of comprehensive income at the point of revenue recognition for fixed-fee milestone projects or are amortised to the consolidated statement of comprehensive income over the licence period for software implementation costs. In the period, an expense of £0.7m (2025: £0.5m) was recognised in the consolidated statement of comprehensive income in relation to capitalised contract fulfilment costs. No significant judgements have been made in determining the amount of costs to be capitalised, which primarily comprise costs within scope of IAS 19 Employee Benefits.

Accrued income relates to satisfied performance obligations where revenue has been recognised but not invoiced at the reporting date. Accrued income is recognised on a time spent basis as performance obligations are met based on agreed fees and day rates, billed in arrears. These are typically short-term timing differences that are administrative in nature at each reporting date. All accrued income balances are expected to be realised within one year and are classified within current assets.

The expected credit loss provision in relation to accrued income was not material as at 31 March 2026. For analysis of the Group's exposure to credit risk, refer to note 22.

14 Cash and cash equivalents

	As at 31 March 2026 £'000	As at 31 March 2025 £'000
Cash at bank	13,891	15,921
Overdrafts reported within short-term borrowings (note 17)	(1,711)	–
Net cash and cash equivalents	12,180	15,921

Cash and cash equivalents are presented net of overdrafts for the purpose of the consolidated statement of cash flows.

Notes to the consolidated financial statements (continued)

15. Trade and other payables

	Note	As at 31 March 2026 £'000	As at 31 March 2025 £'000
Trade payables		1,750	2,940
Accruals		37,951	25,539
Deferred income		5,719	4,999
Taxation and social security		8,559	7,185
Other payables		2,994	2,182
Deferred and contingent acquisition consideration	10	23,344	3,200
Accrued interest on facility B term loans	17	7,138	1,834
Total trade and other payables – current		87,455	47,879

Trade payables comprise amounts outstanding for trade purchases and ongoing costs. The carrying amount of trade and other payables is a reasonable approximation of their fair value. The Group's trade payables payment policy is to make payment within the agreed terms, which is generally 30 days from the date of receipt of invoice.

Accruals include amounts in respect of employee bonuses and other payroll-related liabilities, as well as costs relating to contractors and other suppliers that had not been invoiced at the period end.

The deferred and contingent acquisition consideration liability comprises the amounts due within one year relating to business acquisitions. Refer to note 10 for further details.

Deferred income represents contract liabilities arising from the Group's revenue-generating activities, where consideration is received in advance of the satisfaction of performance obligations under contracts with customers. These liabilities typically result from short-term timing differences between the delivery of performance obligations under fixed-fee milestone or software licence contracts and the related billing schedules. The table below shows the movement in deferred income during the year and includes both current and non-current balances. There were no material movements in deferred income arising from contract modifications or changes in estimates.

	Deferred income £'000
As at 22 May 2024	–
Business acquisitions (note 10)	3,637
Recognised in revenue in the period	(3,328)
Revenue deferred in the period	5,073
Foreign exchange movements	7
As at 31 March 2025	5,389
Business acquisitions (note 10)	104
Recognised in revenue in the period	(5,009)
Revenue deferred in the period	5,624
Foreign exchange movements	12
As at 31 March 2026	6,120

Notes to the consolidated financial statements (continued)

16 Provisions

	Social security tax provisions £'000	Legal and other provisions £'000	Total £'000
As at 31 March 2025	3,288	142	3,430
Business acquisitions (note 10)	356	–	356
Released	(203)	–	(203)
Additions	1,284	–	1,284
Foreign exchange movements	15	1	16
As at 31 March 2026	4,740	143	4,883

Included within social security tax provisions is £2.0m (2025: £2.2m) in respect of potential historical tax exposures originating before the time of Alpha Financial Markets Consulting plc's AIM admission, and a further £2.7m (2025: £1.1m) relating to more recent potential social security tax exposures. The amount and timing of these social security and sales tax provisions are subject to uncertainty. A final position agreed with a tax authority or through the expiry of a tax audit period could differ from the estimated provision.

Legal and other provisions include £0.1m (2025: £0.1m) of dilapidation provisions relating to the Group's leased offices.

Given the uncertainty, a range of outcomes is possible in relation to these provisions. The directors consider the cash outflows in relation to all provisions could reasonably range between £nil and £8.3m.

17 Borrowings

	As at 31 March 2026 £'000	As at 31 March 2025 £'000
Short-term borrowings		
Overdrafts	1,711	–
Revolving credit facility	2,500	3,500
Total short-term borrowings	4,211	3,500
Long-term borrowings		
Facility B term loans – principal	231,358	230,924
Acquisition and capital expenditure facility – principal	30,340	–
Loan arrangement fees	(6,609)	(7,195)
Investor loan notes – principal	200,000	200,000
Investor loan notes – accrued interest	40,569	14,795
Total long-term borrowings	495,658	438,524

Notes to the consolidated financial statements (continued)

17 Borrowings (continued)

In August 2024, the Group entered into a senior facilities agreement with a syndicate of lenders to borrow £230.0m through facility B term loans. The proceeds (net of fees) were used to partially fund the acquisition of Alpha Financial Markets Consulting plc.

Following drawdown, £88.0m of the loans was redenominated into US dollars (\$115.7m) and £44.0m into euros (€52.2m). The foreign currency-denominated portions are retranslated into pound sterling at each balance sheet date. The loans bear variable interest linked to the benchmark rates applicable to each currency. Facility B term loan accrued interest is presented within trade and other payables (see note 15) and is cash-settled on a regular basis. The term loans are repayable in August 2031.

Under the same facilities agreement, the Group has access to a £50.0m acquisition and capital expenditure facility to support its acquisition strategy. In June 2025, the Group drew down \$40.0m (£29.5m) under this facility to fund the acquisition of Auxo Solutions LLC (see note 10). Amounts drawn under the facility bear interest on the same terms applicable to the facility B term loans and are repayable in August 2031.

The Group also has access to a £50.0m revolving credit facility (RCF), which is available to support general corporate purposes, including working capital requirements. The RCF can be drawn and repaid flexibly until its maturity in February 2031 and accrues interest at a variable rate linked to SONIA. As at 31 March 2026, £2.5m (2025: £3.5m) was drawn on the facility.

Loan arrangement fees of £7.6m were incurred at the inception of the facilities agreement, with further fees of £0.3m incurred upon drawdown of the acquisition and capital expenditure facility. These fees were deducted from the loan proceeds received and are presented net against loans in the consolidated balance sheet. The fees are amortised to finance expenses over the term of the loan using the effective interest method.

Certain Group subsidiaries are guarantors of the debt under the senior facilities agreement, and the lenders hold security, subject to customary exclusions and limitations, over the shares and certain material assets (including bank accounts and intercompany receivables) of specific Group subsidiaries. The Group is also subject to a financial covenant based on net leverage. The Group complied with the covenant throughout the year and at the reporting date.

In August 2024, the Group also entered into an agreement with Bridgepoint Europe VII Nominees Limited to borrow £200.0m in the form of investor loan notes, repayable in March 2034. These loan notes accrue interest at a fixed rate of 12% per annum, compounded annually. Under the terms of the arrangement, the Group has sole discretion to either settle the accrued interest in cash or allow it to continue compounding. As at 31 March 2026, £40.6m (2025: £14.8m) of interest had accrued, which is presented within long-term borrowings. No cash interest payments have been made since inception.

Disclosures relating to interest rate risk and foreign exchange risk are provided in note 22.

Notes to the consolidated financial statements (continued)

18. Other non-current liabilities

Notes to the consolidated financial statements (continued)

20 Share capital (continued)

The rights of each class of share, as set out in the Company's articles of association, are summarised below

A ordinary shares

A ordinary shares have voting rights, rights to dividends to the extent declared on the relevant class of shares, and no rights of redemption. On a return of capital, these shares rank behind priority shares and MRP priority shares, and alongside other classes of ordinary shares.

B ordinary shares

B ordinary shares have voting rights, rights to dividends to the extent declared on the relevant class of shares, and no rights of redemption. On a return of capital, these shares rank behind priority shares and MRP priority shares, and alongside other classes of ordinary shares. These shares are also subject to "drag along" and "tag along" provisions.

C1 ordinary shares

C1 ordinary shares have no voting rights or rights of redemption. These shares have rights to dividends to the extent declared on the relevant class of shares. On a return of capital, these shares rank behind priority shares and MRP priority shares, and alongside other classes of ordinary shares. These shares are also subject to leaver, "drag along" and "tag along" provisions.

C2 ordinary shares

C2 ordinary shares have voting rights, rights to dividends to the extent declared on the relevant class of shares, and no rights of redemption. On a return of capital, these shares rank behind priority shares and MRP priority shares, and alongside other classes of ordinary shares. These shares are also subject to leaver, "drag along" and "tag along" provisions.

D1 ordinary shares

D1 ordinary shares have no voting rights, no rights to dividends and no rights of redemption. On a return of capital, a "ratchet" mechanism is applied, whereby these shares hold no value unless an investor hurdle is achieved. These shares are also subject to leaver, "drag along" and "tag along" provisions.

D2 ordinary shares

D2 ordinary shares have voting rights, no rights to dividends, and no rights of redemption. On a return of capital, a "ratchet" mechanism is applied, whereby these shares hold no value unless an investor hurdle is achieved. These shares are also subject to leaver, "drag along" and "tag along" provisions.

Notes to the consolidated financial statements (continued)

20 Share capital (continued)

Priority shares

Priority shares have no voting rights and no rights of redemption. They accrue a "priority amount" daily, which compounds annually at a rate of 12.0%. This amount is distributable at the discretion of the board (with investor consent). On a return of capital, priority shares and MRP priority shares – including the accrued priority amount – rank ahead of all other classes of shares. They rank *pari passu* with the investor loan notes (see note 17). Where held by employees, priority shares are also subject to leaver, "drag along" and "tag along" provisions. The priority shares are classified as equity, as the Group has an unconditional right to avoid the obligation to deliver cash to the holders. Further details on the accounting policy for priority shares are included in note 1.

MRP ordinary shares

MRP ordinary shares have no voting rights or rights of redemption. These shares may participate in dividends and other distributions in accordance with the articles of association, subject to vesting provisions and the distribution waterfall. On a return of capital, these shares rank behind priority shares and MRP priority shares, and alongside other classes of ordinary shares, subject to vesting provisions.

MRP priority shares

MRP priority shares have no voting rights or rights of redemption. These shares may participate in dividends and other distributions in accordance with the articles of association, subject to vesting provisions and the distribution waterfall. On a return of capital, these shares rank *pari passu* with priority shares and the investor loan notes in accordance with the distribution waterfall, subject to vesting provisions.

21 Share-based payments

Following the acquisition of Alpha Financial Markets Consulting plc in the prior period, the Group implemented a management incentive plan ("MIP") to retain and incentivise senior management. In the current year, the Group has implemented an additional management retention plan ("MRP"), aimed at incentivising senior management of newly acquired Auxo Solutions LLC through the post-combination period. These two classes of incentive scheme are described further below.

Management incentive plan ("MIP")

This MIP consists of the allocation of "C" and "D" classes of ordinary shares in the Company. "C1" and "D1" shares are subscribed for across most territories, while participants in France acquire "C2" and "D2" MIP shares through an *Attributions Gratuites d'Actions* ("AGA") plan, following a staggered vesting period and subject to continuing employment. All MIP share allocations and issuances are subscribed for by participants at a subscription price generally below the accounting fair value and are intended to deliver value to the holders on the occurrence of an exit event, provided the value of the Group on exit is above a certain threshold. The "C" class shares rank *pari passu* with all other ordinary shares upon exit. The "D" class shares represent a "ratchet" mechanism, whereby these shares hold no economic value to the holder on exit unless an investor hurdle in the exit value is achieved, at which point the holder would be entitled to an additional share of any proceeds.

Notes to the consolidated financial statements (continued)

21. Share-based payments (continued)

Management retention plan ("MRP")

The MRP relates to "MRP" shares, "MRP ordinary" shares and "MRP priority" shares in the Company. MRP shares were initially issued to employees and were subsequently "booked up" into MRP ordinary shares and MRP priority shares once the Group's valuation reached a specified threshold. This "book up" event occurred during the period, resulting in the conversion of all outstanding MRP shares into MRP ordinary shares and MRP priority shares. Shares issued under the MRP are subscribed for at a price below fair value and are subject to a defined vesting period, following which they participate economically on an equivalent basis to other ordinary and priority shares.

Vesting conditions and share repurchase rights

Shares subscribed for under these plans are either held directly by the participant or held on behalf of the participant through an employee benefit trust ("EBT"). MIP and MRP shares are subject to specified vesting conditions, including continued employment and certain performance-related criteria through to the vesting date or an exit event. Where these conditions are not satisfied, the Group has the right to repurchase the shares from the participant for cash consideration, the amount of which depends on the relevant circumstances.

Movements in the year

The movements in the year are summarised in the table below.

	MRP shares issued	C1 shares issued	D1 shares issued	C2 shares allocated	D2 shares allocated	Total
Outstanding as at 22 May 2024	–	–	–	–	–	–
Issued/allocated during the period	–	534,371	534,371	80,304	80,304	1,229,350
Outstanding as at 31 March 2025	–	534,371	534,371	80,304	80,304	1,229,350
Issued/allocated during the year	10,618,870	75,808	75,808	1,411	1,411	10,773,308
Forfeited during the year	(1,061,887)	(30,576)	(30,576)	(3,207)	(3,207)	(1,129,453)
Conversions during the year	–	7,881	7,881	(7,881)	(7,881)	–
Outstanding as at 31 March 2026	9,556,983	587,484	587,484	70,627	70,627	10,873,205

The C1 shares and D1 shares forfeited during the year were repurchased by EBT and remain in issue. The C2 shares and D2 shares outstanding at the end of the year represent shares that have been allocated under the relevant arrangements, rather than shares that have been legally issued, as this forms the basis of the share-based payment accounting. As noted above, the MRP shares were "booked up" during the year into MRP ordinary shares and MRP priority shares, however, these continue to be accounted for as outstanding share-based payment awards until the vesting period has been completed.

The initial subscription price for the shares is variable, ranging from nil or nominal cost to subscription at an assessed market value of the shares at grant.

The weighted average remaining contractual life of these shares is assumed to be 3.4 years, which is based on management's best estimate of an exit date at the reporting date.

Notes to the consolidated financial statements (continued)

21 Share-based payments (continued)

The fair value of all MIP shares issued in the period was determined at the grant date with the assistance of a third-party valuations expert using a Monte Carlo simulation model. This model estimates fair value by simulating a range of possible outcomes based on randomised inputs for uncertain variables, such as share price volatility. It also incorporates the waterfall mechanism inherent in the Group's capital structure to determine how value would be distributed among shareholders under different scenarios.

The key inputs to the Monte Carlo model included

Input	Value
Total equity value at grant date	£475.7m
Volatility	40%
Expected life	3.9 years
Risk-free rate	3.7%

For Monte Carlo valuation purposes only, the total equity value at grant date is calculated before the deduction of investor loan notes (note 17) and priority shares (note 20).

Volatility is the rate at which the price of a security moves up and down. It is estimated by calculating the annualised standard deviation of daily changes in share price of a basket of comparable companies with similar characteristics, adjusted for leverage.

The weighted average fair value per share has been calculated as £15.18 for the "C" class MIP shares and £1.40 for the "D" class MIP shares issued in the year.

The fair value of MRP shares at the grant date was estimated by reference to a recent arm's-length transaction in the company's shares. The weighted average fair value per share for the MRP shares issued in the year was determined to be £1.04.

The share-based payment expense has been adjusted to reflect management's best estimate of the number of shares expected to be held at exit, incorporating the effect of non-market-based vesting conditions, primarily relating to personal employee performance and continued employment.

The Group recognised a total share-based payment expense of £3.3m in the period in relation to the MIP shares and MRP shares.

Notes to the consolidated financial statements (continued)

22 Financial instruments

Carrying amount of financial assets and liabilities

		As at 31 March 2026 £'000	As at 31 March 2025 £'000
Financial assets measured at amortised cost			
Cash and cash equivalents		13,891	15,921
Trade and other receivables	(i)	94,398	62,551
Total financial assets measured at amortised cost		108,289	78,472
Financial assets measured at fair value			
Derivative financial instruments		675	–
Total financial assets measured at fair value		675	–
Financial liabilities measured at amortised cost			
Trade and other payables	(ii)	49,833	32,495
Lease liabilities		3,704	2,759
Borrowings (net of loan arrangement fees)	(iii)	499,869	442,024
Total financial liabilities measured at amortised cost		553,406	477,278
Financial liabilities measured at fair value			
Deferred and contingent acquisition consideration	(iv)	8,899	15,867
Total financial liabilities measured at fair value		8,899	15,867

(i) Trade and other receivables (note 13) as presented in the table above exclude capitalised contract fulfilment costs and prepayments as these are non-financial assets

(ii) Trade and other payables (note 15) in the table above exclude deferred income and taxation and other social security as these are non-financial liabilities. Earn-out and deferred consideration liabilities are presented as a separate line item in the table above

(iii) Borrowings (note 17) are shown net of loan arrangement fees in the table above

(iv) Deferred and contingent acquisition consideration (note 10) in the table above excludes amounts related to Auxo and Lionpoint as these liabilities are measured in accordance with IAS 19 rather than at fair value

The Group's financial instruments as disclosed in the table above arise in the ordinary course of business and their main purpose is to provide finance for the Group's operations and growth. The carrying amount of these financial instruments is deemed to be approximate to fair value. There has been no impairment loss recognised in respect of financial assets, except for the expected credit loss provision as disclosed in note 13.

Derivative financial instruments are measured at fair value in accordance with IFRS 13. The fair value measurement is classified as level 2 in the fair value hierarchy, as it is determined using valuation techniques that use observable market inputs. Fair value is determined using a discounted cash flow methodology, with observable inputs including forward interest rate curves and discount factors.

Deferred and contingent acquisition consideration is measured at fair value in accordance with IFRS 13. The fair value measurement is classified as level 3 in the fair value hierarchy, as the valuation is based on unobservable inputs. A description of the key assumptions and inputs used in the calculation of the fair value of these liabilities is provided in note 10.

Notes to the consolidated financial statements (continued)

22. Financial instruments (continued)

The Group's operations expose it to a variety of financial risks including credit risk, liquidity risk, and market risk. The board of directors has overall responsibility for internal control and risk management. The policies set by the board of directors are implemented by the Group's finance team and risk management team.

Credit risk

The Group's credit risk is primarily attributable to potential default on its trade receivables. The Group considers a default to have occurred when a balance is over 90 days overdue and there is no realistic prospect of payment. The Group has policies that require appropriate credit checks on potential customers before sales are made.

The Group has provided for a lifetime expected credit loss against the trade receivables balance at the balance sheet date. The likelihood of default is assessed by reference to the ageing category of the receivables. Refer to note 13 for further details. Were the expected credit loss rates applied to receivables to increase by 1% for each ageing category, the resulting additional credit loss to the Group would be £0.7m.

Liquidity risk

The Group has access to a £50.0m revolving credit facility (RCF) alongside its cash balances, ensuring that it has sufficient available funds for its operations. The Group monitors its levels of working capital to ensure that it can meet its liabilities as they fall due.

The following table details the contractual maturity for the Group's financial liabilities. The amounts disclosed are the undiscounted cash flows, based on the earliest date on which the Group could be required to pay. The table includes all principal and interest cash flows to the maturity date of the Group's financial liabilities. Interest payments are estimated based on the interest rates applicable as at 31 March 2026. Deferred and contingent acquisition consideration payments reflect the Group's current estimate of the amounts that will become payable, based on management's expectations of how the acquired businesses will perform against the relevant earn-out targets.

	Note	As at 31 March 2026				As at 31 March 2025			
		Due within one year	Due within one year to five years	Due after five years	Total	Due within one year	Due within one year to five years	Due after five years	Total
		£'000	£'000	£'000	£'000	£'000	£'000	£'000	£'000
Trade payables	15	1,750	–	–	1,750	2,940	–	–	2,940
Accruals	15	37,951	–	–	37,951	25,539	–	–	25,539
Other payables	15	2,995	–	–	2,995	2,182	–	–	2,182
Deferred and contingent acquisition consideration	10	1,300	9,361	–	10,661	3,494	19,937	–	23,431
Interest		27,150	108,600	486,807	622,557	17,167	112,542	483,326	613,035

Long-term borrowings	17	–	–	461,698	461,698	–	–	430,924	430,924
Total		73,646	117,961	948,505	1,140,112	54,822	132,479	914,250	1,101,551

Notes to the consolidated financial statements (continued)

22. Financial instruments (continued)

Long-term borrowings due after five years may become repayable earlier in certain circumstances, such as an exit event (i.e. a sale of the Company or similar). In such cases, the total interest payable would be reduced accordingly.

Payments relating to deferred and contingent acquisition consideration for Auxo and Lionpoint are excluded from the cash flows presented in the table above, as these balances are accounted for under IAS 19 and therefore do not meet the definition of financial liabilities.

A separate maturity analysis of the Group's lease liabilities is disclosed in note 7.

Market risk

Market risk is the risk the future cash flows of a financial instrument will fluctuate because of changes in market prices, including interest rates, foreign exchange rates and inflation.

Interest rate risk

The Group has exposure to interest rate risk through its borrowings. The Group's Facility B term loans and acquisition and capital expenditure facility carry variable interest rates linked to SONIA, EURIBOR and Term SOFR, plus an applicable margin. Fluctuations in these rates can have an impact on the Group's borrowing costs.

In June 2025, the Group entered into interest rate zero-cost collar agreements to economically hedge a portion of this exposure. The derivatives have a combined notional amount of £183.2m, representing approximately 70% of the outstanding balance of the Group's Facility B term loans and acquisition and capital expenditure facility as at 31 March 2026. The derivatives mature in May 2028.

The Group has not designated the derivatives in a qualifying hedge accounting relationship and therefore measures them at fair value through profit or loss. As at 31 March 2026, the derivative assets had a fair value of £0.7m (2025: £nil). During the year, a fair value gain of £0.7m (2025: £nil) was recognised within finance expense in the consolidated statement of comprehensive income.

Based on market interest rates prevailing as at 31 March 2026, the relevant reference rates were between the floor and cap rates specified in the derivative contracts. Accordingly, no contractual cash inflows or outflows are expected under the collars based on conditions existing at the reporting date, although future cash flows will vary depending on movements in market interest rates prior to maturity.

If interest rates applicable to the Group's variable-rate borrowings had been 2% higher in the year ended 31 March 2026, with all other variables held constant, the Group's finance expense for the year would have increased by approximately £2.2m. This sensitivity reflects the impact of the Group's interest rate collars.

Foreign currency exchange rate risk

The Group is exposed to foreign exchange risk due to its geographically diverse operations. Revenue is earned in various foreign currencies across North America, Europe, APAC and the Middle East. The Group also holds assets and liabilities denominated in foreign currencies within these regions. Consequently, the Group's financial performance and position is subject to exchange rate fluctuations, which may affect reported revenue and result in gains or losses on the translation of foreign currency assets and liabilities.

Notes to the consolidated financial statements (continued)

22. Financial instruments (continued)

The impact on the Group's revenue in the period arising from a 5.0% adverse movement in all foreign exchange rates relevant to the Group would be £10.7m (2.9%). The same sensitivity would also result in a decrease in the Group's net assets of £6.0m.

The table below shows the Group's cash and cash equivalents, trade receivables, accrued income and trade payables in the Group's main currencies, stated in local currency.

	GBP '000	EUR '000	USD '000	CAD '000	CHF '000	SGD '000	AUD '000	AED '000	QAR '000
Cash and cash equivalents	75	1,482	6,965	446	197	507	1,015	864	18,780
Trade receivables	22,727	7,415	44,639	148	704	2,502	926	20,927	5,832
Accrued income	5,380	3,094	13,479	332	417	110	912	8,412	2,942
Trade payables	(1,045)	(112)	(576)	(11)	(28)	(31)	(205)	(16)	–
Net amount	27,137	11,879	64,507	915	1,290	3,088	2,648	30,187	27,554

The currency profile of the Group's borrowings is disclosed in note 17.

Inflation risk

Inflation risk is the risk that the increased rate of inflation in the market will have a material impact on the Group's forecasted cash flows. The Group has therefore considered current and plausible inflation levels when forecasting future cash flows. The Group does not believe that inflationary pressures represent a material risk to the Group's financial performance or position.

23 Capital management

The Group manages its capital structure to support its ability to continue as a going concern, provide returns to shareholders, and benefit from the use of capital gearing. The capital structure comprises net debt (calculated as borrowings less cash and cash equivalents) and shareholders' equity. The directors review the capital structure periodically and may adjust it in response to changes in economic conditions, the Group's business strategy, or investment opportunities. There have been no changes to the Group's approach to capital management during the period. The table below provides a breakdown of the Group's capital.

	Note	As at 31 March 2026 £'000	As at 31 March 2025 £'000
Short-term borrowings	17	4,211	3,500
Long-term borrowings	17	495,658	438,524
Cash and cash equivalents	14	(13,891)	(15,921)
Net debt		485,978	426,103
Shareholders' equity		140,559	195,819
Total capital		626,537	621,922

Notes to the consolidated financial statements (continued)

24. Related party transactions

Bridgepoint

The Group is majority owned by certain funds managed by Bridgepoint Advisers Limited, an indirect subsidiary of Bridgepoint Group plc. As a result of this relationship, Bridgepoint Group plc and its subsidiaries are considered to be related parties of the Group.

Bridgepoint Europe VII Nominees Limited holds investor loan notes issued by the Company with an outstanding principal amount of £200,000,000 (2025: £200,000,000) and accrued interest of £40,569,000 (2025: £14,795,000) as at 31 March 2026. Further details of the loan notes are disclosed in note 17.

A fee of £150,000 is payable to Bridgepoint Advisers Limited for making available the services of certain directors of the Company in the year, of which £88k was unpaid as at 31 March 2026 and is included within accruals (note 15).

During the year, the Group earned revenue of £1,214,000 (2025: £322,000) from the provision of consulting services to subsidiary companies of Bridgepoint Group plc.

Key management personnel

Key management personnel are those individuals who have authority and responsibility for planning, directing and controlling the activities of the Group. In the opinion of the directors, the Group's key management personnel comprise the statutory directors of the Company, as listed in the directors' report on page 17. In the prior period, key management personnel staff costs include remuneration relating to periods before certain individuals were formally appointed as directors of the Company.

Staff costs in the period in relation to these key management personnel were as follows:

	Year ended 31 March 2026 £'000	Period ended 31 March 2025 £'000
Wages, salaries and short-term benefits	1,656	737
Social security costs	296	132
Defined contribution pension costs	68	29
Share-based payment charge	193	23
Total staff costs for key management personnel	2,213	921

There were no other transactions with key management personnel or close members of their family.

Subsidiary companies

Transactions and outstanding balances between the Company and its subsidiaries have been eliminated on consolidation and are therefore not disclosed in this note.

Notes to the consolidated financial statements (continued)

25 Ultimate controlling party

Based on the definition of control in IFRS 10, the ultimate controlling party of the Group is Actium Topco (UK) Limited, which is the Company preparing these consolidated financial statements

The Group is majority owned by certain funds managed by Bridgepoint Advisers Limited, an indirect subsidiary of Bridgepoint Group plc. There are a range of limited partners who invest in these funds, none of whom have a controlling interest in Actium Topco (UK) Limited

26 Events after the reporting period

Acquisition of JPSB Group Limited

After the reporting period, in May 2026, the Group acquired JPSB Group Limited, a specialist SimCorp-focused technology consulting and implementation firm. The acquisition strengthens Alpha's capability in investment platform transformation, adding scaled SimCorp expertise and amplifying its ability to support clients across both advisory and delivery.

The cash consideration payable on completion under the acquisition agreement was £8.0m. There is no deferred or contingent consideration connected to this acquisition.

Due to the proximity of the acquisition to the date of approval of these financial statements, the initial accounting for the business acquisition has not yet been completed, and as such, the full disclosures required under IFRS 3 have not been provided.

Acquisition of Elgin White Limited

After the reporting period, in May 2026, the Group acquired Elgin White Limited, a specialist consultancy focused on investment technology and platform delivery. The acquisition further strengthens Alpha's investment platform transformation capability, adding deep expertise in implementation and delivery, with particular strength in Charles River Development (CRD). This enhances Alpha's ability to support clients across increasingly complex, large-scale investment technology programmes.

The cash consideration payable on completion under the acquisition agreement was £19.8m. This initial payment remains subject to working capital and other customary closing adjustments. In addition, contingent consideration may become payable in respect of financial performance in the calendar year 2026, based on a multiple of earnings.

Due to the proximity of the acquisition to the date of approval of these financial statements, the initial accounting for the business acquisition has not yet been completed, and as such, the full disclosures required under IFRS 3 have not been provided.

Notes to the consolidated financial statements (continued)

26 Events after the reporting period (continued)

Refinancing

In June 2026, the Group completed a refinancing of its debt facilities. As part of the refinancing, the Group entered into an additional £70.0m term loan facility. Proceeds of £30.0m from the additional term loan were used to repay investor loan notes and the related accrued interest.

As part of the refinancing, the Group also secured an additional acquisition and capital expenditure facility of £70.0m. Subsequent to the refinancing, £27.2m was drawn under this facility to fund the post-balance sheet acquisitions of JPSB Group Limited and Elgin White Limited.

The directors have considered the impact of the events described above and concluded that they represent *non-adjusting events occurring after the reporting date*, therefore no adjustment has been made to the recognition or measurement of assets and liabilities in these financial statements.

Issued share capital

Issued share capital represents the nominal value of issued and fully paid shares, including both ordinary and priority shares. Details of the Company's issued share capital are provided in note 20 of the consolidated financial statements.

Share premium

Share premium comprises the excess of consideration received over the nominal value of shares issued, net of directly attributable transaction costs incurred in the issuance of those shares, including both ordinary and priority shares.

Other reserves

Other reserves comprise the cumulative fair value of equity-settled share-based payments recognised in accordance with IFRS 2 and amounts relating to the repurchase of the Company's own shares by the employee benefit trust ("EBT").

Retained earnings

Retained earnings represent the cumulative net profit or loss, as recognised in statement of comprehensive income, net of dividends and other distributions.

Notes to the Company financial statements

1 General information and accounting policies

General information

Actium Topco (UK) Limited is a private company, limited by shares, incorporated in England and Wales with the registered number 15735478. Its registered office is WeWork, 7th Floor, Moor Place, 1 Fore Street, Moorgate, London, EC2Y 9DT, United Kingdom. The Company is a holding company, and its principal activity is to hold and manage investments in subsidiary companies.

Basis of preparation

The Company financial statements present information about the Company as a separate legal entity, rather than the consolidated Group, and have been prepared on a historical cost basis.

These financial statements have been prepared in accordance with FRS 101 *Reduced Disclosure Framework*. In preparing these financial statements, the Company applies the recognition, measurement and disclosure requirements of International Financial Reporting Standards ("IFRS") but makes amendments where necessary to comply with the Companies Act 2006.

The Company has taken advantage of the following disclosure exemptions available under FRS 101:

- The requirements of paragraphs 45(b) and 46 to 52 of IFRS 2 *Share-based Payment*
- The requirements of paragraphs 62, B64(d), B64(e), B64(g), B64(h), B64(j) to B64(m), B64(n)(ii), B64(o)(ii), B64(p), B64(q)(ii), B66 and B67 of IFRS 3 *Business Combinations*
- The requirements of IFRS 7 *Financial Instruments: Disclosures*
- The requirements of paragraphs 10(d), 10(f), 16, 38A, 38B, 38C, 38D, 40A, 40B, 40C, 40D, 111 and 134 to 136 of IAS 1 *Presentation of Financial Statements*
- The requirements of paragraphs 1 to 63 of IAS 7 *Statement of Cash Flows*
- The requirements of paragraphs 17 and 18A of IAS 24 *Related Party Disclosures*
- The requirements in IAS 24 *Related Party Disclosures* to disclose related party transactions entered into between two or more members of a group
- The requirements of paragraphs 130(f)(ii), 130(f)(iii), 134(d) to 134(f) and 135(c) to 135(e) of IAS 36 *Impairment of Assets*

The presentational currency of these financial statements and the functional currency of the Company is pound sterling. All amounts presented have been rounded to the nearest £1,000, except where otherwise stated.

Going concern

The directors have a reasonable expectation that the Company has adequate resources to continue in existence for at least 12 months from the approval of these financial statements. Accordingly, the directors have adopted the going concern basis in preparing these financial statements. For further details, refer to note 1 of the consolidated financial statements.

Principal accounting policies

The principal accounting policies of the Company are consistent with those set out in note 1 of the consolidated financial statements, except in relation to investments in subsidiary undertakings and share-based payments.

Notes to the Company financial statements (continued)

1. General information and accounting policies (continued)

Investments in subsidiary undertakings

Investments in subsidiary undertakings are accounted for at cost less provision for impairment. Acquisition accounting under IFRS 3 is not applied in the Company's separate financial statements.

Share-based payments

The Company operates share-based payment arrangements under which equity instruments of the Company are granted to employees across the Group. Details of these arrangements are provided in note 21 to the consolidated financial statements.

As the awards are settled using the Company's equity instruments, the Company is considered the settling entity and recognises the corresponding credit to equity within other reserves. For awards granted to employees of subsidiary undertakings, the Company recognises the share-based payment charge as an increase in its investment in subsidiary undertakings, reflecting the benefit received by the relevant subsidiary from employee services.

Under the Group's recharge arrangements, the cost of awards is recharged to the relevant subsidiary undertaking. Amounts recharged are recognised within amounts due from subsidiary undertakings, with a corresponding reduction in the carrying value of investments in subsidiary undertakings. Movements arising from share-based payment capital contributions and related recharges are presented on a net basis within investments in subsidiary undertakings (see note 2).

Significant judgements and estimates

The preparation of financial statements in accordance with IFRS requires management to make judgements, estimates, and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income, and expenses.

The directors have not made any significant judgements, other than those involving estimations, in applying the Company's accounting policies that have had a material effect on the amounts recognised in the financial statements for the year ended 31 March 2026.

The directors also consider that there are no key sources of estimation uncertainty that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

New accounting standards and interpretations

The Company has adopted all standards, interpretations and amendments that are effective for the current accounting period. Standards, interpretations and amendments that have been issued but are not yet effective have not been early adopted by the Company, as detailed in note 1 of the consolidated financial statements. The adoption of standards, interpretations and amendments effective in the current period did not have a material impact on the Company financial statements, and the adoption of standards, interpretations and amendments issued but not yet effective is not expected to have a material impact on the Company financial statements.

Notes to the Company financial statements (continued)

2 Investments

	Investments in subsidiaries £'000
Cost	
As at 22 May 2024	–
Additions	238,790
As at 31 March 2025	238,790
Additions	142
As at 31 March 2026	238,932

During the year, £3.3m (2025: £nil) was recognised in investments in subsidiary undertakings in respect of share-based payment charges, which were subsequently recharged in full to subsidiary undertakings under intra-group recharge arrangements. These amounts are presented net within the table above in accordance with the Company's accounting policies.

The carrying amount of investments in subsidiaries was reviewed for impairment as at 31 March 2026, with reference to the value of the underlying trading group. No impairment was identified.

Information about related undertakings

In accordance with Section 409 of the Companies Act 2006, the following table sets out the subsidiary and associated undertakings in which the Group and the Company held an interest of 20% or more as at 31 March 2026. Actium Midco 1 (UK) Limited is a direct subsidiary of Actium (UK) Topco Limited. All other entities listed are indirect subsidiaries of the Company. The Group holds 100% of the issued share capital in each subsidiary undertaking, with all shares being ordinary (or an equivalent class).
